THE KRIDER NURSERIES
INCORPORATED
MIDDLEBURY, INDIANA, U. S. A.

Foreword

*"For Those Who Realize
the Value of Quality"*

For thirty-five years—ever since The Krider Nurseries were established—it has been our wish that all our friends and customers might visit our nursery and that we might show you the home of the flowering and fruiting stock that is being sent you under our labels.

Thousands do visit our nursery and we extend to all of you an invitation to drive in. We have 420 acres in one block at Middlebury, Indiana. Our office is three blocks from the center of the village and we have laid out four miles of drives through our nursery. You can drive your car past millions of shrubs and evergreens in full bloom and beauty. Acres of roses and acres of phlox in bloom in season. Rest and eat your lunch in the shade of the trees near the lily pool, fed by natural springs, where we grow a complete line of water lilies and water plants that bloom throughout the summer months. You will enjoy an afternoon with us and a cordial welcome awaits you.

But such a trip being impractical to the vast majority of you we are doing the next best thing; we are sending you facsimiles of the fruit and flowers we grow. We are presenting you a catalog which not only brings form and color to your vision, but those more subtle qualities—the appetizing plumpness of the apple, the luscious quality of the peach, the juiciness of the berry, and the glorious shadings of the colorful rose. In all respects save perfume—and by the grace of the imagination you may have even that in these pages—you have in this catalog a literal presentation of what your garden and orchard may produce from our stock.

GUARANTEE

The Krider Nursery Co., Inc., guarantee that each plant, shrub and tree shall be of a size and quality as shown in this catalog and that it will reach customer in good growing condition. The company will replace free of charge any stock not in good condition when it reaches customer upon receipt of freight or express bill properly signed by the agent with a notation of the loss or damage entered thereon.

The Krider Nurseries guarantee all parcel post shipments to reach customer in good condition but complaints must be made within five days after goods are received.

The company further agrees to replace at one-half regular catalog price any shrub or tree dying during the first year after planting provided written report is made before October 1st following date of purchase.

The company further guarantees that every plant, shrub, or tree is true to name and will replace free of charge or refund purchase price of any proven not to be so, but it is mutually agreed between purchaser and ourselves that we will not be held for any greater amount than the original purchase price.

It is only by a comparison of the hardy, thrifty, sure to bear stock with weak inferior plants that will dwindle and pine away and finally "peter out" that you can be convinced of the meaning of the phrase, "**for those who realize the value of quality.**"

It means success instead of failure, it means satisfaction instead of disappointment. It means the joy of achievement and success, whether it be a rose, a rock garden or a whole orchard.

Krider's hardy northern grown, true-to-name stock will please you. The best is none too good. Don't waste years of time on inferior stock when just a few cents means the difference between vigor and weakness.

For thirty-five years we have served you. We have grown from small to big. Our vigorous stock has undoubtedly appealed to you or you would not have re-ordered again and again as many of our old customers do from year to year. You have told others, our best advertisement.

Look over our prices. They are as low as good stock can sell for. Higher prices can buy no better quality.

Order abundantly today, with eye to future need, that you and yours may harvest with both pleasure and profit.

Special Premiums for Early Orders

As a rule most people wait until the first warm, sunshiny days of spring before they begin to think of ordering trees, plants and vines. Then they all send in their orders at one time, and to take care of these orders promptly we have to employ extra clerks and packers. If we can induce part or all of our patrons to send in their orders early we can distribute this work over a longer period of time and not only handle the orders better, but with a much smaller force of men and women. This means a considerable saving of time and money to us, and is the one and only reason we can make the liberal premium offer as set forth below.

REMEMBER THE DATE BEFORE THIS OFFER EXPIRES

For all spring orders amounting to \$5.00 received before March 15th, we will allow you to select \$1.00 worth of any fruit or shrubbery listed in our catalog. For all orders amounting to \$10.00 we will allow you to select \$2.00 worth. For all \$20.00 orders, \$4.00 worth, and for all \$50.00 orders, \$12.00 worth; for all \$100.00 orders, \$25.00 worth.

No special premiums after date given above and no discount on special collections.

General Information

LOCATION. Our plant is located at Middlebury, Ind. Here we have our offices and 410 acres of as fine nursery growing land as can be found. We are on U. S. 20 from Boston to Chicago, half way between Lagrange, Ind., and Elkhart, Ind. Ten miles north-east of Goshen, Ind., and 12 miles south of U. S. 112, which you leave at White Pigeon, Michigan.

ORDERING. In ordering be sure to state how you want your orders sent and give your express office. Order early. On all orders of one dollar or more received before March 10th, we will add a Rambler Rose as a premium, providing you mention it in your order.

SUBSTITUTION. We do not substitute unless requested. When you place your order here you get what you want or **your money back.**

REFERENCES. First State Bank, Middlebury, Indiana; Elkhart County Trust Company, Goshen, Indiana, or any bank or business house in Elkhart County.

SHIPMENT. We commence to ship about March 10th, weather being favorable, and shipping season lasts until May 25th. We ship order any week you designate in your letter, weather being favorable. We have every means at hand to have your stock reach you in the best condition. We can make shipment South in February if desired, on roses, shrubs and fruit trees.

TERMS. Cash before order is shipped. We will book orders when one-fourth cash accompanies the order, balance to be paid before stock is shipped.

CLAIMS. All claims for shortage must be made inside of ten days after goods are received. If stock is not satisfactory, complaint must be made at once. No attention will be paid to claims received months after the goods have been received.

PARCEL POST. Everything contained in this catalog that is of light measure, is sent to you parcel post and all prices on bargain offers, rose collections, shrubs, etc., are quoted parcel post paid. Please note that on everything in this catalog except heavy trees, balled evergreens, the prices are given postpaid if you so desire, so there is no reason for not knowing just what the stock will cost you laid down at your door.

REMITTANCES. Make same by express money order, post office order, draft or registered letter. Checks from responsible persons are also taken. Please do not send stamps and please see that all orders are for at least one dollar.

Dear Friends and Customers:

It is particularly significant that I call your attention to a number of important facts pertaining to my 1933 catalog. First, I want to assure you, most earnestly, that the strictest adherence to quality will be insisted upon in every instance. I especially emphasize this fact because of the amazing, almost unbelievable prices prevailing throughout this book. I desire that you accept as a positive statement from myself, as an officer of this company, that all goods will be of the same high quality you have always enjoyed.

We are able to quote these low prices principally because we grow everything we sell. We buy nothing to resell and upon which we would have to add a profit. We are far below competitive prices, a fact which you will recognize.

We have built our business to one of the largest in the country on the sound principle of fair dealing and this policy will never be altered. I promise you, this year, the greatest bargains on quality merchandise you have ever been able to get. Consequently, this is the **TIME** to buy.

Thanking you for past favors, I am,

Respectfully yours,

Vernon H. Krider

General Manager,
The Krider Nurseries.

Rhododendrons Planted Five Years at Residence of Vernon H. Krider.

Rose Values You Will Never Forget

Collection "B"

Consisting of:

Golden Dawn

Mme. Albert Barbier

President Herbert Hoover

Here illustrated.

No. 1, 2-yr., field grown stock.

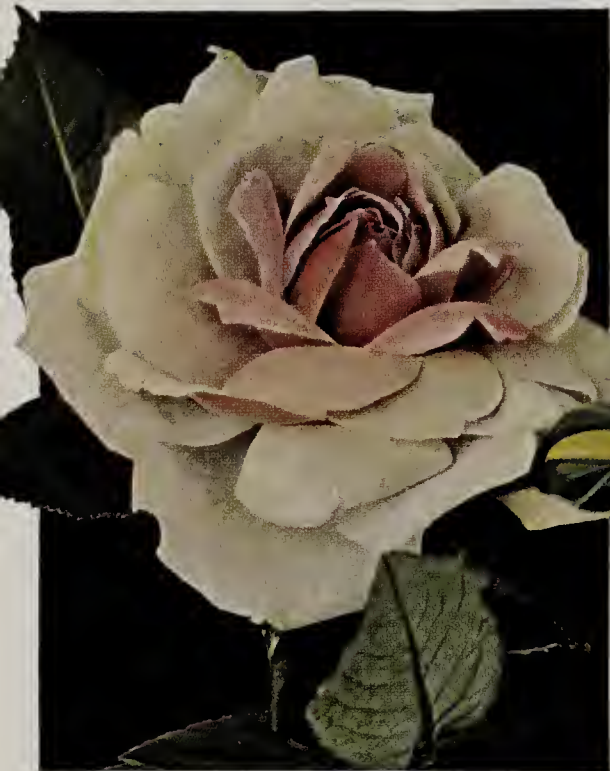

\$3.00 Value

for **\$1.39**

Postpaid

Golden Dawn.

Mme. Albert Barbier.

Golden Dawn. A magnificent new Rose with which we have been most favorably impressed, an ideal garden Rose of an exquisite light lemon-yellow color. Its buds are of an ovoid form, heavily splashed with crimson before opening and develop into splendidly shaped full double, moderately fragrant flowers. **Each, \$1.00.**

Mme. Albert Barbier. A magnificent new variety of fully double formation, great freedom and extra long blooming season. Pearl-white suffused with blush pink, the golden apricot glow from base and center richly illuminating. It blooms without ceasing from spring to autumn and is bound to become exceedingly popular. **Each, \$1.00.**

President Herbert Hoover. The fame of this wonderful multi-colored rose has swept the country and certainly no rose planting would be complete without it. It combines many shades of cerise-pink, flame, scarlet, and yellow, the long buds being beautifully formed, opening slowly and possessing a most delicious fragrance. In all stages of bloom, from bud to fully opened flower, it is unusually attractive. Gold Medal at International Flower Show. **Each, \$1.00.**

Krider Nurseries,
Middlebury, Ind.

Gentlemen:

Sept., 20, 1932.

Out of the 48 roses which I purchased from you this spring 41 grew. The bushes are planted in a specially prepared bed and have had the most exacting of attention all summer. The 41 bushes have been the sensation of the neighborhood. Two weeks ago a jar of these roses were prize winners at the local garden show.

Very truly yours,

WESLEY W. WETZEL
Fort Atkinson, Wis.

The Krider Nurseries,
Middlebury, Ind.

Dear Sir:

Sept. 20, 1932.

This is a long way to send for a few shrubs but the roses I got from you a few years ago are doing wonderfully.

Yours truly,

CHAS. B. PETERSON,
Minneapolis, Minn.

President Herbert Hoover.

Rev. F. Page-Roberts.

Rev. F. Page-Roberts

A Rose of remarkable beauty both in form and color. The long, pointed buds are of a coppery red; stained red on the outside and open to good, full double, fragrant flowers of a golden yellow, particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. **Each, \$1.00.**

Talisman

The most sensational Rose of all times, and has been awarded more Gold Medals than any other American production. Its brilliant orange-red buds, long and beautifully formed, open to a large, fragrant, double bloom of glowing golden yellow, stained with copper-red and orange-yellow on the inside. Its colorings are magnificent, and it arouses the greatest admiration everywhere. The plant is healthy, vigorous and hardy, with glossy green foliage. **Each, \$1.00.**

Schwabenland.

You Can't Buy Better Roses

Collection C

Consisting of

TALISMAN

REV. F. PAGE-ROBERTS

SCHWABENLAND

\$3.00 Value, Postpaid for \$1.39

Talisman.

Schwabenland

There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over 5 inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop; the flowers are carried singly on long, stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. Specially recommended for cold climates.

Each, \$1.00.

Hardy Climbing Roses

These are the Roses so necessary for the home, giving it, no matter how humble or pretentious, a touch of beauty not to be had by any other form of adornment. They also have a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the grounds, for screening outbuildings. Are especially recommended for trailing down over embankments and for cemetery planting; not subject to insect attack. All are hardy everywhere.

**Prices of Climbing Roses—all varieties:
2 yr., 25c each; 5 for \$1.00, postpaid.**

Climbing American Beauty. Flowers of large size, good form, of rich, red color passing to crimson. Very fragrant. Good foliage and absolutely hardy.

Dorothy Perkins. Beautiful shell-pink, which hold for a long time, shading to a lovely deep rose. Very sweetly scented, hardy and a strong grower.

Dr. W. Van Fleet. This new Rose has a great future. In flower and foliage it is all that could be expected of a climbing Rose. Blossoms extra large, resembling the tender Hybrid Tea Roses in shape and size. Its strong stems are 12 to 18 inches long, making it valuable for cutting. In color a delicate flesh-pink changing when full blown to a flesh-white shade.

Excelsa or Red Dorothy Perkins. Intense crimson-scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all climbers.

Paul's Scarlet Climber. An entirely new variety, combining vigorous growth, wonderful foliage and absolute hardiness, together with flowers almost as large as those produced on bush Roses; in color a brilliant scarlet which lasts well.

Flower of Fairfield (Ever-blooming Crimson Rambler). Brilliant crimson. Flowers almost continually in brilliant clusters from early summer until frost.

Dorothy Perkins.

Dr. W. Van Fleet.

Crimson Rambler. One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson. One year plants will attain a height of 10 to 20 feet in a single season and the second year they will produce a marvelous profusion of their rich glowing crimson flowers.

Tausendschon (Thousand Beauties). Varying in shade from a delicate flushed white to a deep pink or reddish crimson, in bright clusters, almost covering the handsome green foliage. A climbing Rose that comes to us from Germany. It gets its name

from its many flowers and from their variation in coloring.

White Dorothy Perkins. A pure white sport from Dorothy Perkins, with which it is identical in variety and habits. A valuable addition to the hardy climbing class. The plant is a strong, rampant grower, covering a large porch or trellis in a remarkably short time.

Tausendschon.

Dyersburg, Tenn.

The Krider Nurseries,
Middlebury, Ind.
Gentlemen:

Your reply to my letter and also catalog received. Will say that after seeing roses that I got from you bloom, my friends and acquaintances here so admired them that I secured many nice orders of roses and bulbs for you and feel sure that I can get still more without any effort. I only lost one rose out of the dozen I got from you last fall.

Sincerely yours,
MISS NAOMI HARWOOD.

Baby Ramblers in Solid Bed.

Special New Varieties of Baby Ramblers

Lafayette Loose clusters; its individual flowers 3 inches wide, semi-double and prettily ruffled, strung together in great branching sprays of as many as forty. Brilliant cherry-crimson color. 2 yr., postpaid..... **50c**

Gloria Mundi This new variety is probably the best and most generally satisfactory of all the orange-scarlet Polyanthas recently introduced. Its color certainly is emphatic, clear and uniform, and comparatively unfading. The petalage is fully double, with many good sized florets in each cluster. 2 yr., postpaid..... **50c**

Golden Salmon A recent novelty, and one of the most attractive. The flowers are large, semi-double, thickly clustered, and never missing throughout the entire season. Color a beautiful red-salmon overlaid with a sheen of orange and gold, the light eye daintily conspicuous. 2 yr., postpaid..... **50c**

Above three postpaid for \$1.00

Baby Ramblers and Polyantha Roses

Orleans. Deep cerise or geranium-pink, with center of pure white. The showiest of the Baby Ramblers. 2-yr., 50c each; 3 for \$1.00, postpaid.

Verdun. The newest creation of Baby Ramblers. Intense red color. One of the finest Baby Ramblers ever introduced. 2-yr., 50c each; 3 for \$1.00, postpaid.

Rugosa and Hybrid Rugosa Roses

The Rugosa Rose was introduced from Japan years ago. It is absolutely hardy, with fine, thick, heavy foliage. But the flowers are single.

By crossing the Rugosa Rose with the best of the double, everblooming varieties, a new race has been developed in which are retained the fine, vigorous growth, the extreme hardiness, the abundant and lasting dark green leaves of the Rugosa type, combined with the size and color of the best everblooming Roses.

F. J. Grootendorst. A cross between Rosa Rugosa and Baby Rambler, retaining all the vigor, hardiness, and healthy foliage of the Rugosa. Fine red blooms. The only hardy and everblooming hedging or massing Rose, and for these purposes it is ideal. Each, 35c; 3 for \$1.00, postpaid.

Conrad Ferdinand Meyer. Strong grower, perfectly hardy. Flowers silvery rose, large, well filled, very fragrant. 2-yr., 35c each; 3 for \$1.00, postpaid.

F. J. Grootendorst.

Eskimo Beauties

Each, 35c; 3 for \$1.00, postpaid.

The Roses that grow where no others will. Hybrid Rugosa Roses in which are combined the best qualities of the different Rose species.

Belle Poitevine (An Eskimo Beauty). The blooms are large and full, the petals gracefully incurved. Bright clear, lively pink.

Sir Thomas Lipton (An Eskimo Beauty). Pure white; no tinge of pink or yellow—just pure white. The flowers are very double and borne in graceful clusters.

Hansa (An Eskimo Beauty). Hand-some in bud and bloom. Both are large, very full and double. The color is rich maroon-red.

SPECIAL

Hugonis (The Golden Rose of China). Blooms three weeks earlier than most other Roses. Hugonis has proved hardy everywhere in the United States, a shrub-rose of countless uses—splendid for specimens, popular in shrubbery plantings, handsome for hedges. Still more in its favor, it's beautiful!—great golden, hollyhock-like flowers of clear yellow on maroon colored canes in May. Such a dazzling display in front of your place. **Each, 2-yr., 50c; 3 for \$1.00, postpaid.**

Hugonis Rose.

The Newest ROSES at Popular Prices

GOLDEN EMBLEM.

Most beautifully shaped, rich yellow Rose, splashed with carmine on the outside of bud, large, dark, polished foliage. Price, \$1.00.

Two-Year-Old Field-Grown Roses

Your choice of any Rose illustrated on this page except "Golden Emblem" at

50c each or

3 for \$1.25

6 for \$2.00

or the entire 10

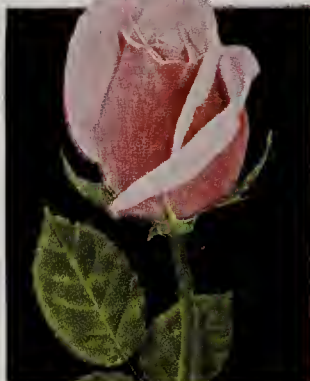

Including "Golden Emblem"—A Regular \$5.50 Value—for only

\$3.00

ETOILE DE HOLLANDE—

The finest dark red Rose for general purposes, having great vigor and floriferousness.

MRS. A. R. BARRACLOUGH

A new variety of giant growth with long, tapering buds. Glowing pink tinged salmon.

VATERLAND

Flower large, blood-red with coppery reflexes—an unusual color. Fragrant.

MRS. A. R. WADDELL

A stiff, branching grower with flowers much like Lady Pirrie, but darker salmon-pink.

DAME EDITH HELEN

One of the largest and most perfectly shaped pink Roses known. Blooms abundantly.

EDITH NELLIE PERKINS

A handsome new variety with long-pointed buds. Orange outside and salmon-pink inside.

WILLIAM F. DREER.

A beautiful yellow Rose, recurved petals flushed with red in center.

ANGELE PERNET

The most brilliantly colored mandarin and yellow Rose in existence; large, semi-double.

SENSATION

Large buds of blackish maroon. The darkest red Rose grown.

3 Ramblers In a Class By Themselves

Primrose.

Primrose

A pure yellow, hardy climbing Rose. Its large, double flowers are a soft, rich primrose-yellow, and are borne in clusters of 4 and 5 on an extremely vigorous plant, with beautiful foliage. Very new and we believe the most satisfactory yellow climber for the North.

Field-grown, \$1.50 each, postpaid.

Blaze

Never in all of the history of the Rose industry has there come to our attention a Rambler Rose with the ever-blooming qualities of the new Rose Blaze. This has all of the appearance and color of the Paul's Scarlet Climber and blooms continuously throughout the summer, making a Rose that has filled a long-felt want in the nursery trade. We have contracted for some of these Roses from the originator, at an enormous expense and we are going to give them absolutely free to our customers in the \$2.50 offer set forth on this page. Every Rose will be protected by a label herewith illustrated and protected by a plant patent issued by the United States Government. None genuine without this label.

Mme. Gregoire Staechelin.

From Spain—

First of a New Type

Mme. Gregoire Staechelin

"The Spanish Beauty." Today's wonder Rose. Delicious fragrance—quite rare in hardy climbers. A choice cut flower—also unique in this class; tight bud long-pointed, opening bud urn-shaped, full blown flower semi-double, cup-shaped, and broad to five inches; the cutting stem 12 to 15 inches long. The color is charming, in vase or on the vine; maroon in the bud, carmine to pearly pink as the perfumed petals unfold. Just one glorious month of bloom, but even that is unusual; each stem displaying its three to five flowers one at a time. The foliage is olive-green, leathery and plentiful. 12 feet of growth a year; two years to the roof. Europe gave it the supreme Bagatelle gold medal in '27, America the John Cook medal in '29. You can get it from us, to use on pillar, trellis or fence. **\$1.00 each, postpaid.**

Free With the purchase of one Primrose and one Mme. Gregoire Staechelin we will send you, absolutely free, the sensational new Blaze Rose. A regular \$2.00 value. All 2-year, field-grown.

Blaze.

Each, \$2.00, postpaid.

RED RADIANCE. The ideal garden Rose. Color a lovely rich red, blooms large and of a beautiful globular form, which come on heavy individual canes all through the summer and until frost. Superb for cutting or garden display.

PINK RADIANCE. One of the outstanding American Roses. Color a light silvery pink, deepening to salmon; very large, borne in great abundance on long, strong stems. Continuous bloomer. Beautiful and dependable.

LUXEMBOURG. A top-ranking yellow Rose, with long pointed buds of exquisite texture. Rich bronze-yellow colorings, delightful fragrance. A distinctive Rose of the highest rank and one of the few hardy Yellow Roses for the garden. Visitors at the nursery last summer were especially attracted to the Luxembourg.

COLUMBIA. One of the greatest bedding and cutting Roses of them all. Its beautifully formed buds are of a lively pink which becomes brighter and more intense as the bloom matures. Large and very free-flowering. There should be Columbia Roses in every collection.

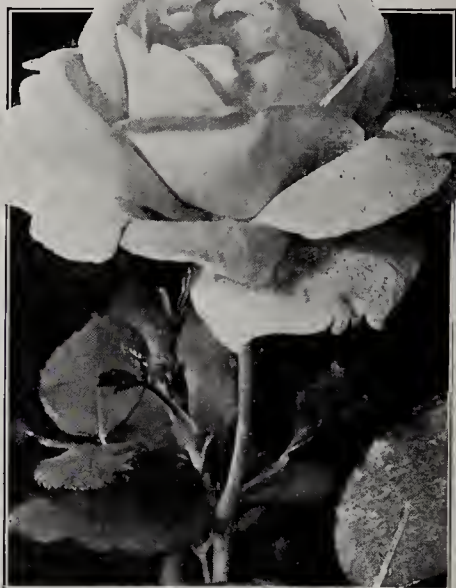

LOS ANGELES. One of the most notable American garden Roses. Its color is a luminous flame pink, toned coral, shaded translucent gold at base of petals. An upright, sturdy grower, bearing perfect, fragrant flowers on strong stems. Desirable in every garden.

MRS. JOHN LAING. Very large, long pointed buds opening to immense, full, moderately fragrant, beautiful, soft pink flowers. Low, vigorous growing plant; profuse bloomer.

PAUL NEYRON. One of the best for outdoor culture; probably the largest Rose in commerce, the flowers sometimes being six inches in diameter. Fragrant, clear pink blooms, shading to rose; a vigorous, hardy plant.

MRS. AARON WARD. A most desirable and dependable variety. Semi-double, cup-shaped, deep Indian yellow. A profuse bloomer.

K. A. VICTORIA. Immense creamy white blooms of perfect form, full and double, are borne on long, strong stems. Profuse, steady bloomer, and one of the finest of all white roses. Charming in bouquets and especially desirable for the garden.

Red Radiance.

Killarney.

ULRICH BRUNNER. Rich crimson-scarlet flowers. Very fragrant.

FRAU KARL DRUSCHKI. A large white rose of perfect form. Hardy and the best white variety.

GRUSS AN TEPLITZ. Bright scarlet shading to velvet crimson. A profuse bloomer and especially adapted for bedding purposes.

KILLARNEY. Color flesh, shaded white. Noted for its large size and intense fragrance.

SOUVENIR DE CLAUDIUS PERNET. There is no other yellow Rose like this—it has been awarded the very highest prizes and is considered the finest pure yellow Rose ever produced in Europe. Its color is a lovely sunflower-yellow, shading to deeper yellow in center, a color that it retains in bud and open bloom. Buds are large, long-pointed; flowers full, double and with delightful fragrance, that are produced on long, stiff stems, ideal for cutting. Foliage is healthy, glossy, and disease resistant. Plant of vigorous, upright habit.

PREMIER. Very lovely both in the bud and open flower; color a rich shade of rose-pink, shading to a deep rose bust, and a heavy bloomer. One of the choicest Ever-blooming Roses.

GEN. JACQUEMINOT. A very fragrant sort, brilliant velvety crimson, and large in size.

SUNBURST (Giant Yellow). Immense buds, long and pointed, on strong, stout stems opening into beautiful, gigantic, full, deep, double flowers, which are borne continuously. Color coppery yellow, with golden orange in deeper shades. Magnificent bush Rose, stands four feet or more in height. Foliage immense in size and strong, vigorous in habit of growth. Superb.

Columbia.

The Krider Nurseries,
Middlebury, Indiana.

Dear Sirs:

I received my order of Norway Spruces and I am delighted with them. They are positively the best stock I ever received and the price is wonderful.

I am the counsellor of a Nature Club here and I am making an effort to get the members more keenly interested in evergreens. If you will co-operate I will surely do all I can to have them order from you.

Sincerely,
REV. H. F. HENRY
112 Wall St., Kalamazoo, Mich.

EXTRA SPECIAL.

Japanese Barberry Hedge. 18 to 24 in., 100 for \$12.50, prepaid.

Ornamental Hedges at Amazingly Low Prices

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high, as a screen. City lots may be divided by hedging with fine effect. In dozens of different ways, which suggest themselves to the property owner, hedging may be used with great profit. A hedge is easily set, a little care will keep it in perfect condition and it is a wonder that more are not planted.

Can you imagine anything more beautiful and fascinating than a living fence? That's what a hedge is. How much more friendly than the old-fashioned wood and iron fences! As modern ways of planting call for a clear view of the house front, nothing is better than a neatly trimmed hedge along the borders of property. A walk or drive bounded by hedges is charming.

Amoor River Privet. This is the hardiest of all Privets and especially desirable for planting in the North. Not subject to blight. In warm climates it is nearly evergreen, and even in the North the foliage remains far into the fall. Glossy green leaves. Privets may be trimmed to any desired height and shape. **\$5.00 per 100.**

SPECIAL.

Amoor River Privet Hedge. Best for northern states. 100 for \$5.00, prepaid. 18-24 in., 2-yr.-old stock.

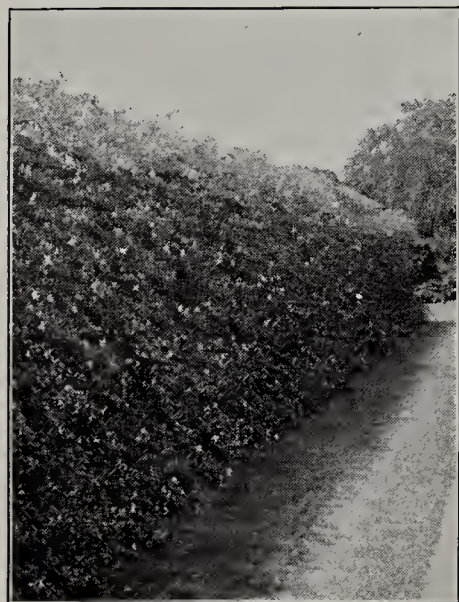

Price, heavy, 2-year stock, 10 for 60c;

Ibota Privet. This variety has long been recognized as one of the best and most beautiful plants for hedges. It makes a quick, strong growth and is free from insects and scale.

Leaves are dark, glossy green. **Price, heavy, 2-year stock, 10 for 75c; 100 for \$5.00.**

Japanese Barberry. The Improved Thunberg's Barberry that is entirely free from rust and may be planted in any state. A beautiful plant, whether used for group planting, shrub masses or hedges. Foliage bright green, turning to reddish bronze in fall. Brighter colors obtained in a sunny location. Branches loaded with scarlet berries in fall that are retained during the winter. **Price, 15c each; 8 for \$1.00; 100 for \$12.50.**

Special Note: A unique hedge may be made by planting Japanese Barberry with Spirea Van Houttei (described on page 16). Alternate three Barberry then three Spirea Van Houttei and plant in a straight line. Keep the Spirea pruned to a height about 6 to 8 inches greater than the Barberry. We can furnish Ibota or Regel Privet hedge at same price as Amoor River.

Honeysuckle Hedge. Pink flowers, red berries. Ideal for high hedge. 18-24 in., 25c each; 10 for \$2.00; 100 for \$10.00, prepaid.

Arbor-Vitae. Makes a neat, beautiful hedge. It stands trimming well. Especially effective in winter. **12-18 in., \$20.00 per 100.**

Norway Spruce. For Hedges and windbreaks. **12-18 in., \$25.00 per 100.**

Field Grown Hardy Ornamental With Highly

French Lilacs.

It's a better home if it's planted. Just a little shrubbery adds a touch of beauty. It has been said that we may doubtless live as long without beauty around the home but just as doubtless not as happily.

Almond

Double-Flowering. A most desirable early-flowering shrub, with white or pink flowers. **1-yr., 25c; 2-yr., 50c; 3-yr., 75c.** State color wanted.

French Lilacs

French Lilacs are grafted stock, they never sucker up on the lawn; become specimen trees. Our stock is 3-year, transplanted specimens, running 2 to 3 feet high.

While the supply lasts we are offering these at **50c each; the entire collection of 10 for \$4.00, prepaid. 2-year, 18 to 24 in., choice, 3 for \$1.00, postpaid.**

This collection includes the following new and well known varieties:

- Berryer.** Semi-double; clear mauve. New.
- Chas. X.** Single red; large trusses; beautiful. (See No. 1 opposite).
- Claude Bernard.** Semi-double; bright lilac. New. (See No. 3 opposite).
- Hugo Koster.** Single; lilac with reddish tint. New. (See No. 2 opposite).
- Jan Van Tol.** Single; pure white; very large trusses and extremely large, individual flowers; it is a very good grower and flowers freely. New.
- Ludwig Spaeth.** Large; single purple.
- Marie Legrave.** Pure white; single; immense clusters.
- Michael Buchner.** Double; pale lilac. New.
- President Grevy.** Large trusses of double red flowers.
- Vauben.** Double; tender mauve. New.

Hypericum

Henryi (Gold Flower). Forms a shrubby recumbent bush, 2 to 2½ feet high, of smooth purplish arching stems. Single, 2-inch or larger bright golden flowers, the rich color heightened by the many tufted yellow stamens with reddish anthers. Their foliage is fern-like, with dark, shiny upper surface, richly contrastive to the abundant bloom which is quite persistent. Does very well in partial shade if soil is not too dry. **2-yr. plants, 60c each; \$5.50 per 10, postpaid.**

Prolificum. Of variable growth up to 5 feet; abundant dark glossy leaves. Blooms profusely with ½- to 1-inch yellow flowers in several to many axillary cymes. **18 to 24 in., 60c each; \$5.00 per 10, postpaid.**

Hypericum—Gold Flower.

Weigela Floribunda.

Weigela

FLORIBUNDA. Of all shrubs of late creation, the everblooming red Weigela floribunda surpasses everything in a red-flowering shrub. Much hardier than Eva Rathke and a better red flower. The flowers commence blooming early in the spring and bloom profusely all summer long. The leaves are a glossy green and when the shrub is three years old the flowers are in such profuse clusters as to completely hide the leaves. Every customer should find a place for one to three of these beautiful shrubs in their border plantings. They are grafted and never sucker up and we have 5,000 two-year-old transplanted shrubs to offer our trade this spring at a price in line with the cheaper flowering Weigela. **2-yr., 18-24 in., 50c each; 3 for \$1.00, postpaid.**

Shrubs— Colored Flowers

Philadelphus

(Mock Orange or Syringa)

This old-fashioned shrub with creamy white flowers borne in clusters is found in many plantings. There are many varieties that offer a wide range of size and blooms. All varieties are strong growers and are suitable for border, screen or specimen planting. We have a few new varieties that are exceptionally fine and you will be highly pleased with them. **1-yr., 25c; 2-yr., 50c; 3-yr., 75c, postpaid.**

Coronarius (Mock Orange). A tall, vigorous bush. Fragrant white flowers in May, resembling orange blossoms. Abundant dark green foliage. Does well in shady places. Fine for cutting. **3-yr., strong bushes, 35c each; 3 for \$1.00, postpaid.**

Virginal. Blooms throughout the season. This is a new and wonderful addition to the Mock Orange family but is far beyond anything in this line that has been brought out in the past. It is without question one of the most beautiful shrubs and once it becomes known will be planted on every home ground. Because of its being new the supply of this variety is scarce and high priced, but we are going to offer these at the following low prices as long as our supply of this shrub lasts. **18-24 in., 35c each; 10 for \$3.00. Large, 2-3 ft. plants, 50c each; 10 for \$4.00, postpaid.**

Philadelphus Virginalis.

Berberis - Barberry

Atropurpurea (Red Japanese Barberry). This shrub fills a long felt want. Since wheat rust attacked this country and all purple and common Barberries had to be cut out there has been a great demand for a new type that would satisfactorily take the place of the old purple Barberry. We offer the new Red Japanese and guarantee that if it is placed in a position of plenty of sun it will do as well as the old time purple. Red Japanese Barberry may be used for shrubbery border, for clumps, or even as a specimen shrub. The color is a rich bronzy red similar to the best of the Bloodleaf Japan Maples. It is like the Japanese Barberry in all other respects, attaining its beautiful orange and bronze coloring in fall, and bearing the same profusion of bright red berries throughout the winter. **12-15 in., 35c; 18-24 in., 75c, postpaid.** See colored cut opposite.

Red Barberry.

Special, 2-yr., 12-15 in., 15c each; 8 for \$1.00, postpaid.

Althea - Rose of Sharon

Unsurpassed by anything in the hardy shrub line for freedom of bloom or range of color. From midsummer until frost, when few other shrubs are in bloom, the Althea is most handsome, with its large camellia-like flowers of the most varied and beautiful shades. **Double White.** White; crimson center. **Double Variegated.** Pink and white. **Double Red.** An excellent striped variety, nicely marked white and rose. **Double Purple.** **Double Blue.** Deep blue.

Price, 2-yr., 2-3 ft., 25c each; 5 for \$1.00, postpaid.
Any color desired.

Althea—Rose of Sharon.

Shrubs for the Shade

2-year, field-grown, 2 to 3 ft., 35c each; 3 for \$1.00; 10 for \$2.50, postpaid.

The Three Best

Beauty Bush

(*Kolkwitzia amabilis*)

A wonderful new, and as yet, very rare ornamental shrub, originating in the wilderness of China. Lovely and graceful, and finer than any weigela ever offered. Covered early in May with the utmost profusion of bloom. The individual flowers are rather small, lipped something like a foxglove, clear pink with brownish spots and veins. The flowers are produced along the entire length of the branches in clusters at the ends of the short, leafy shoots, and are borne in such profusion that the bush is one cloud of delicate pink. The tiny rose-colored buds are fascinatingly hooded with fuzzy jackets which remain to decorate the seed pods. The graceful habit of the bush, its year-round beauty in foliage and habit, its free flowering qualities and pleasing color, combined with perfect hardiness make this one of the most beautiful and useful shrubs.

Beauty Bush.

35c each; 3 for \$1.00, postpaid.

Korean Spirea.

35c each; 3 for \$1.00.

Symphoricarpos Chenaulti

(New Red Snowberry)

This new red Snowberry is the greatest shrub for shady places that we have ever seen introduced. It grows to a height of 4 feet. Has long branches covered with lacy leaves, the branches of which in turn are covered in late fall with a mass of glowing red berries twice the size of the old Indian Currant and as red as High Bush Cranberry. Don't fail to plant some of these shrubs in your shady location.

We can also furnish the following shrubs for shady places. Too well known to need description; at 25c each; \$2.00 per 10, postpaid, in 2-yr., 18 to 24 inch plants.

- | | | |
|-----------------------|-------|--|
| Barberry, Japanese | | Berberis Thunbergi. |
| Coralberry | | Symphoricarpos vulgaris. |
| Dogwoods | | Cornus alba, paniculata, stol-onifera. |
| Hazelnut | | Corylus americana. |
| Hollygrape, Oregon | ... | Mahonia aquifolium. |
| Honeysuckle, Fragrant | ... | Lonicera fragrantissima. |
| Pachysandra | | Pachysandra terminalis. |
| Privet | | Ligustrum, various. |
| Snowberry | | Symphoricarpos racemosus. |
| Spirea | | Spiraea, various. |
| St. Johnswort | | Hypericum aureum. |
| Viburnums | | Viburnum, especially V. acerifolium. |
| Wintercreeper | | Euonymus radicans. |
| Witch-hazel | | Hamamelis virginiana. |

Korean Spirea

(*Spiraea trichocarpa*)

This handsome new shrub was discovered in Korea, and has been enthusiastically admired by all who have seen it since its introduction in America, and has been acclaimed the best of all the Spireas. It is a splendid, healthy plant, growing, when matured, 4 to 6 feet tall, and even greater in diameter, forming a big, dome-shaped bush covered in its season with large, rounded clusters of snowy flowers marked with darker eyes. It is hardy as far north as Montreal, and is most attractive in habit and foliage, even when not in bloom. It is more robust and blooms two weeks later than the familiar Spirea Van Houttei, and is far more desirable. It retains its beautiful glossy green foliage late into the autumn.

Red Snowberry.

Shrubs With Attractive Fruits for the Birds

2-year, field-grown, 2 to 3 ft., 35c each; 3 for \$1.00; 10 for \$2.50, post-paid.

High Bush Cranberry (*Viburnum Opulus*)

Handsome native shrub attaining 12 feet with rather smooth, light branches and stems. The pure white flowers appear in May and June, followed by decorative fruits, which begin to color by the end of July and remain on the branches and keep their bright scarlet color until the following spring. Berries are not eaten by birds.

Tartarian Honeysuckle (*Lonicera tatarica*)

The best known of all the Bush Honeysuckles, and in our estimation the finest variety of all. Grows to a height of 8 to 10 feet, with upright, somewhat spreading branches and bright green foliage. The flowers are borne freely in May and June, are of bright pink color, followed by showy red berries, which ripen in midsummer and cling to the bush for several weeks.

High Bush Cranberry.

White Snowberry (*Symphoricarpos racemosus*)

Inconspicuous, rose colored flowers in June and July, followed by large, clustered, milk-white fruits which remain far into winter. This combination of pink flowers and white berries on the same twig is charming. Bush is compact in form with numerous slender, twiggly branches. Can be used in small groups in large mass and border plantings, and kept in the foreground on account of its dwarfish habit. The Snowberry will give success in a shady location as well as a sunny spot.

White Snowberries.

Honeysuckle *Grandiflora Rosea*.

Shrubs with Attractive Fruits

We can also furnish the following shrubs with attractive fruits, 2 to 3 ft., 35c each; 3 for \$1.00; 10 for \$2.50.

| | | |
|------------------------------|-----------------------------------|--------------------|
| Barberry, Japanese | <i>Berberis thunbergii</i> . | Red. |
| Burningbush, European | <i>Euonymus europaeus</i> . | Orange and red. |
| Coralberry | <i>Symphoricarpos vulgaris</i> . | Red. |
| Cranberrybush | <i>Viburnum opulus</i> . | Red. |
| Elder, Red | <i>Sambucus racemosus</i> . | Red. |
| Euonymus, Brook | <i>Euonymus americana</i> . | Orange and red. |
| Firethorn | <i>Pyracantha coccinea</i> . | Red. |
| Honeysuckle, Belle | <i>Lonicera bella</i> . | Red. |
| Honeysuckle, Tartarian | <i>Lonicera tatarica</i> . | Red, yellow. |
| Jetbead | <i>Rhodotypos kerrioides</i> . | Black. |
| Privet, Common | <i>Ligustrum vulgare</i> . | Black. |
| Privet, Iboia | <i>Ligustrum ibota</i> . | Black. |
| Rose, Japanese | <i>Rosa rugosa</i> . | |
| Snowberry | <i>Symphoricarpos racemosus</i> . | White. |
| Viburnums | <i>Viburnum</i> , various. | White, red, black. |

The Three Most Popular Spireas at Popular Prices

Spirea Anthony Waterer.

Spirea Van Houttei (Bridal Wreath). Graceful, with long, drooping sprays, thickly studded with handsome pure white flowers, hence its popular name of "Bridal Wreath." This is the finest and probably the most beautiful of the Spireas, and one of the most popular of all shrubs. In May and June the arching branches are covered with little white flowers. The foliage is very beautiful, dark green in color, and finely cut, making the bush attractive even after the flowers are gone. It grows 6 feet in height, is extremely hardy, and can be used to good advantage either as a specimen or in the border. One of the best for flowering hedges and screens, in fact, its uses are legion. This Spirea is very prominent in mass plantings. **2 yr., 18 to 24 in., 10c each; \$1.00 per doz.,**

Spirea Van Houttei.

Spirea Arguta.

postpaid. 2 to 3 ft., 20c each; \$1.50 per doz., postpaid. 3- to 4-ft. clumps, 35c each; \$3.00 per doz., postpaid.

Spirea Arguta (Garland Spirea). The unusual mass of tiny white flowers crowd the pendent branches, making it one of the showiest of spring shrubs. Foliage bright green, leaves very narrow and attractive. **18 to 24 in., 15c each; \$1.50 per doz., postpaid. 2 to 3 ft., 35c each; \$3.00 per doz., postpaid.**

We can furnish eight other varieties of Spirea in 18 to 24 in., 2 yr., at 35c each; \$3.00 per doz., postpaid. Billiardi, Billiardi Alba, Bumalda, Froebeli, Opulifolia, Opulifolia var. Aurea, Prunifolia, Thunbergi.

Viburnum Carlesi

(Mayflower Viburnum)

A truly wonderful new medium sized shrub from Korea, prized for its exquisite fragrance similar to that of the Trailing Arbutus. The waxy flower clusters, pink in bud, pure white when open, appear early in the spring. Thrives under most usual conditions, but does best in partial shade and cool, moist soil. A charming plant for the foreground of the border or in planting about the house.

2-yr., 18-24 in., field-grown stock, \$1.00 each, postpaid.

Viburnum Carlesi.

Buddleia - Butterfly Bush

Veitchi magnifica. A very attractive new addition to the flowering plants. While a perennial in habit, yet because of its vigor and size, it is used largely in shrub plantings. The tops in severe winter will freeze back, but it pushes with such renewed vigor this is not harmful. The flowers are borne on the tips of every bit of new growth, and in August the plants are masses of purple and violet flowers, very conspicuous, that attract butterflies.

18-24 in., 25c, postpaid.

3 for 50c

Postpaid

10 Hydrangea, P. G.

\$1.85

An Extraordinary Value

Actual photograph of the plants we send you.

The above photograph shows one of our blocks of 10,000 Hydrangea P. G. These are all grafted, true type Hydrangeas, the best block we have ever grown. We offer you these in 2 yr., No. 1 plants, 3 canes and up, at 25c each; 3 for 60c; or 10 for \$1.85, postpaid. Plant Hydrangea P. G. liberally around your grounds. No better shrub for foundation, separate groups, shrub groups or a hedge along the driveway.

1.—Colorado Blue Spruce. 2.—Concolor Fir. 3.—Austrian Pine. 4.—Mugho Pine.
5.—Pyramidal Arbor-Vitae. 6.—Savin Juniper.

Special Offer of Four-Year Evergreens

Bargain Offer No. 101

1 Colorado Blue Spruce, 8-12 in. XX. Each, 50c } **3 for 98c**
1 Austrian Pine, 9-12 in. XX. Each, 50c } POSTPAID
1 Mugho Pine, 8-12 in. XX. Each, 50c }

Bargain Offer No. 102

1 Concolor Fir, 8-12 in. XX. Each, 50c } **3 for 98c**
1 Pyramidal Arbor-Vitae, 9-12 in. XX. Each, 50c } POSTPAID
1 Savin Juniper, 9-12 in. XX. Each, 50c }

Send us five names and addresses of friends interested in evergreens and we will send you both above collections for \$1.59, postpaid. The two collections will make a planting similar to above. Plant in the garden two years and they will grow 2 feet high.

Big Evergreens at the Price of Babies

F. O. B. Middlebury, Indiana

Abies - The Firs

This family embraces many different forms and characters. They are pyramidal, erect and spreading; foliage varying in color from light to dark green, to gold and blue. They possess the vigor to establish themselves in any type of soil and will thrive in clay, stony and poorer soils where some evergreens may fail.

Douglas Fir. One of the finest of all specimen evergreens. Resembles Blue Spruce. Add this one to your selection. XX, 6-12 in., 25c; 12-18 in., \$1.00; 2-3 ft., \$3.00; 3-4 ft., \$5.00, each.

Juniperus - Junipers or Cedars

Trees are generally pyramidal in shape and hardy everywhere. The needles are short and generally bright on the under side. They transplant kindly and should be more generally used. They are nearly all native of the northern country and more handsome in cultivation than in their native soil.

Virginiana (Red Cedar). A well known native tree; varies much in habit and color of foliage; very attractive in winter when the golden bronze of the young growth contrasts with the dark green of the older. 18-24 in., \$1.00; 2-3 ft., \$2.00; 3-4 ft., \$3.00.

Glauca (Blue Cedar). Similar to Red Cedar in form and a soft blue-green color; closely columnar. 18-24 in., \$2.00; 2-3 ft., \$3.00.

Hibernica (Irish Juniper). Of slender columnar habit with glaucous green foliage. Useful for formal planting. 18-24 in., \$1.00; 2 ft., \$2.00; 3 ft., \$3.00.

Pfitzeriana (Pfitzer Juniper). A graceful, broad, pyramidal evergreen with sweeping fronds of gray-green foliage, making in time a distinctive, beautiful tree. XXX, 12-18 in., \$1.00; 18-24 in., \$2.50; 2-3 ft., \$3.00.

Sabina (Savin Juniper). Especially suitable for hillside planting or among rocks; like a prostrate shrub in habit, and useful for all low planting. The foliage is deep green and unchanging in its color. 12-18 in., \$1.00; 18-24 in., \$2.50; 2-3 ft., \$3.00.

Arbor-Vitae

American. One of the finest evergreens for hedges. It grows rapidly and soon forms a most beautiful hedge; very dense. Of course it is never adapted to turn stock, but it forms a most desirable and ornamental screen to divide the lawn from other parts of the grounds. 12-18 in., 50c; 18-24 in., 75c; 2-2 1/2 ft., \$1.25; 2 1/2-3 ft., \$1.50; 3-4 ft., \$3.00.

Pyramidalis. An exceedingly beautiful, bright variety, resembling the Irish Juniper in form; foliage a deep green, color well retained in winter; perfectly hardy. Should have a place in every collection. 12-18 in., 50c; 18-24 in., \$1.00; 2-3 ft., \$2.00; 3-4 ft., \$5.00.

ARBOR-VITAE—Continued.

- Compacta.** Foliage light green; habit dwarf and compact. Fine for small places. **12-15 in., \$1.00; 15-18 in., \$2.00.**
- Peabody Golden.** Very beautiful, attaining a size of 8 to 10 feet. **10-12 in., \$1.00; 12-18 in., \$2.00; 2-3 ft., \$5.00.**
- Tom Thumb.** Small compact, with feathery foliage. A beautiful ornamental for small yard or cemetery lot or low hedge. **12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.**
- Globosa.** Forms a dense, low, globe shape. A beautiful evergreen. Particularly fine for formal plantings. **12-15 in., \$1.00; 15-18 in., \$2.00.**
- Hovey's Golden.** A small tree, globular in form; foliage light green with a golden tinge and very compact; hardy. **12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.**

Picea - The Spruces

These are all easy to transplant, and the most popular of the evergreen family. They are perfectly hardy and grow rapidly and are pyramidal in shape, used for specimens in groups or for foundation adornment, and as screens, windbreaks or hedges they are equally appropriate. Needles are uniformly short. We have a fine stock of sheared plants that will please every purchaser.

Colorado Blue (*Picea pungens glauca*). This species has been tested at various points on the prairies of the West and Northwest with perfect success, enduring a temperature of 30 degrees below zero in exposed situations, entirely uninjured. This is not only one of the hardiest, but the most beautiful in color and outline; of a rich blue or sage color; it is a valuable acquisition. **8-10 in., 25c; XX, 10-12 in., 75c; XXX, 12-18 in., \$2.50; 18-24 in., \$5.00; XXX, 2-3 ft., \$8.00.**

Norway. A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich, and as it gets age, has fine, graceful, pendulous branches; it is exceedingly picturesque and beautiful. Very popular, and deservedly so. One of the best evergreens for hedges and windbreaks. **X, 12-18 in., 50c; XXX, 18-24 in., \$1.00; XXX, 2-3 ft., \$2.00.**

Hemlock (*Tsuga canadensis*). An elegant pyramidal tree, with drooping branches and delicate dark foliage, like that of the yew. Distinct from all other trees. It is a beautiful lawn tree and makes a highly ornamental hedge. **XX, 12-18 in., \$1.00; XXX, 18-24 in., \$2.00; XXX, 2-3 ft., \$3.50.**

Pinus - The Pines

Pines seem to grow anywhere, high or low ground, exposed or shaded position, in rich or poor soils, they are at home. After established they grow rapidly and when given space quickly raise their heads and spread their great branches, soon making a wonderful tree. The needles are invariably long and with age droop gracefully. Plant any kind and be assured of getting quick results.

White (*Pinus strobus*). The most ornamental of all native Pines; foliage light delicate or silvery green. **XX, 12-18 in., \$1.00; XXX, 18-24 in., \$2.00; XXX, 2-3 ft., \$2.50.**

Mugho (*Pinus mughus*). This is an excellent dwarf Pine, being globe-shaped and erect branching when the new growth, which seems like miniature candles, completely covers the bush. **XX, 5-6 in., 25c; 12-15 in., \$2.00; 15-18 in., \$2.50.**

Retinispora

Pisifera (Pea-Fruited *Retinispora*). Erect branches, pendulous at the tips; foliage feathery, light green, glaucous beneath. **12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.**

Plumosa (Green *Retinispora*). Densely conical, with fernlike leaves of bright green carried on erect, plummy branches. **XXX, 15 in., \$1.50; XXX, 18 in., \$2.00; 18-24 in., \$3.00.**

Plumosa aurea (Golden *Retinispora*). One of the few really golden evergreens. The color of the young growth contrasts strongly with the darker shade of the older foliage. Striking and useful in many ways. **12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.**

Note.—(X) means number of times transplanted. Write for prices on large specimen evergreens, 6-8 feet high. We have them.

Six-year-old Specimen Pyramidal Arbor-Vitae.
12-18 in., 50c each; 18-24 in., \$1.00 each; 2-3 ft., \$2.00 each, prepaid.

3- to 5-eye Divisions

Vines and Creepers

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to veranda. Hardy vines practically take care of themselves after they are once established. All vines postpaid.

Silver Lace Vine

Polygonum Auberti. Always scarce and in demand is this charming climber which will clamber gracefully over a trellis, porch or arch, or upon any support which may be devised. Grows rapidly, averaging 25 feet in a season. A well grown specimen is a cloud of lacy, misty white shot with tints of cream and pale rose of most exquisite effect. Produces more bloom than any other hardy vine, covering a season extending from late summer till well into the fall. **Strong 2-year vines, only 50c each; 3 for \$1.35, postpaid.**

Silver Lace Vine.

Ivy - Ampelopsis

Virginia Creeper or American Ivy (A. Quinquefolia). A perfectly hardy, rapid climber, with large, five-lobed leaves which change to bright scarlet or crimson in autumn. **1-yr., 25c; 2-yr., 50c each, postpaid.**

Boston or Japan Ivy (A. Veitchii). From Japan. It is a splendid plant for covering any object, as it clings perfectly to the smoothest surfaces. The foliage is a bright glossy green, changing to bright tints of scarlet, crimson and orange. Kills back some in a cold, dry climate. **1-yr., 25c; 2-yr., 50c each; 12 for \$3.50, postpaid.**

Aristolochia

Dutchman's Pipe (A. Siphon). A native species of climbing habit and rapid growth, with magnificent light green foliage, ten to twelve inches in diameter, and curious, pipe-shaped, yellowish brown flowers; a splendid variety for archways or verandas. **1-yr., 25c; 2-yr., 50c each, postpaid.**

Honeysuckle - Lonicera

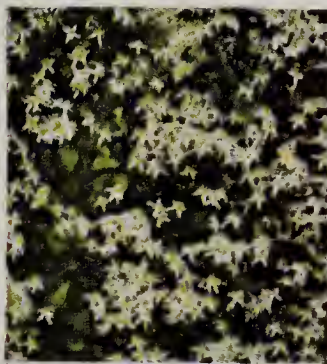

Lonicera Heckrotti. The wonder vine of the 20th century. Blooms all summer with pretty red flowers. Fine cover and foliage plant and very richly scented. If you are looking for a new vine and one that will give you pleasure all summer, include one of these in your next order. **2-yr., 75c each.**

Hall's Japan (Lonicera Halliana). A strong, vigorous evergreen variety, with pure white flowers, changing to yellow.

Very fragrant; covered with flowers from June to November. **1-yr., 15c; 2-yr., 25c each.**

Clematis Jackmani.

Clematis Paniculata.

Wisteria

Chinese Purple (Wisteria Sinensis). A most beautiful climber of rapid growth, and producing long, pendulous clusters of pale blue flowers. When well established it makes an enormous growth; it is very hardy; and one of the most supreme vines ever introduced. The very best vine to grow when it is desired to have it shade the upper part of the house. **1-yr., 25c; 2-yr., 35c each.**

Clematis

2-yr., field-grown, each, 50c; 3 for \$1.00, postpaid.

A beautiful class of climbers, many of the varieties with flowers, 5 to 7 inches in diameter. Excellent for pillars or trellises; or when used for bedding, running over rock work or an old tree stump, they make an excellent show. They delight in a rich soil, a sunny situation; perfectly hardy.

Henryi. Fine large, creamy white flowers. A strong grower and very hardy, one of the best of the white varieties; a perpetual bloomer. **1-yr., 35c; 2-yr., 50c each.**

Jackmani. The flowers when fully expanded are from 4 to 6 inches in diameter; intense violet-purple with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frost. **1-yr., 35c; 2-yr., 50c each.**

Madame Edouard Andre. Flowers large, of a beautiful, bright, velvety red; free-flowering and a continuous bloomer. **1-yr., 35c each; 2-yr., 50c.**

Paniculata or Sweet-Scented Japan Clematis. A Japanese plant possessing unusually attractive qualities. Very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. Flowers are medium size, pure white, borne in immense sheets and of a most delicious fragrance. **1-yr., 35c; 2-yr., 50c each.**

Clematis Mme. Ed. Andre.

Our Special Clematis Group Offer

The three great Clematis, in 2-year, No. 1, field-grown stock. **Paniculata.** Hardy white-flowered type; sweet scented.

Jackmani. The large purple-flowered type. This is the one most admired. Blooms over the early summer in masses of purple flowers.

Mme. Edouard Andre. The new red one, a full brother to Jackmani, same size of flowers excepting red in color.

We are offering these this year in this collection at

50c each; or 3 for \$1.00, postpaid.

Clematis is easily grown but must have a sweet soil. Put a bushel of sweet soil in the hole before planting Clematis.

Three Trees YOU Should Use to Beautify Your Home

Cut-Leaved Weeping Birch. Its tall, slender, yet vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents attractive characteristics rarely met with in a single tree. Very popular for single lawn specimens or groups; the white bark of trunk and twigs gleaming conspicuously among the darker greens and browns.

Lombardy Poplar.

4-5 ft., 50c; 5-6 ft., \$1.00, prepaid.

Lombardy Poplar. The selective appreciation of trained landscape builders is getting this fine type into much more general use. Old trees which were thoughtfully placed, are outstanding landmarks today; their great height, dense slenderness, and sombre silhouette against the skyline, a picturesque effect.

Cut-Leaf Weeping Birch.

5-6 ft., \$1.00; 6-8 ft., \$2.00, prepaid.

Special Combination Offer

The three trees illustrated will be sent to you prepaid for ONLY..... **\$2.50**
A Regular \$3.00 Value.

Babylonian Weeping Willow.

5-6 ft., \$1.50; 6-8 ft., \$2.00, prepaid.

Babylonica Weeping Willow. A graceful tree of large size. Its fresh, bright green tint and long, wavy branches make it very attractive.

Rock Garden Plants

No garden is complete nowadays without its rock garden and the hardy rock plants that so much enhance the collection of perennials that furnish color and picturesqueness to our plantings. Even the tiniest of gardens have gems of miniature gardens, and more pretentious estates show you with pride rare specimens that cause the visitor to gasp with pleasure. Be sure to use enough plants to hide the rocks. Avoid the appearance of a rock pile.

Our selection of rock plants includes those hardy kinds that respond to care and do not have to be pampered. With ordinary attention they will thrive for you. What a kick one gets out of building a rock garden. Why not try it?

Prices, unless otherwise noted, of all rock plants: 15c each; 6 for 80c; 12 for \$1.50; 100 for \$10.00, postpaid.

ACHILLEA tomentosa. 6 to 8 inches. July to September. Bright yellow flowers. Excellent for rockeries.

AETHIONEMA grandiflora (Persian Candytuft). Strong, twiggy bushes, covered with long, slender spikes of rosy pink flowers. One of our best rock plants. **Each, 30; 3 for 75c.**

Achillea tomentosa.

Aubrietia.

PACHYSANDRA terminalis (Japanese Spurge).

A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage. A ground cover which will grow in all shady situations and the only plant which will thrive under pine trees.

PHLOX subulata (Moss or Mountain Pink). An early spring flowering type with pretty mosslike, evergreen foliage, which, during the flowering season, in April and May, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground or covering graves.

SAXIFRAGA cordifolia (Megasea). These will thrive in any kind of soil and in any position. Grow about 1 foot high and fine among rocks or ledges.

SEDUM (Stonecrop). Dwarf varieties. America's greatest rock plant. Suitable for the rock garden, carpet-bedding, covering of graves, etc.

SEDUM Sieboldi. Round, succulent, glaucous foliage; bright pink flowers in August and September.

SEDUM spurium coccineum. A beautiful rosy crimson flowered form. July and August. 6 inches.

SEDUM Stahli. Very fine rock plant.

STRIPED ORNAMENTAL GRASS. Ideal for rockery and pool.

Clumps, 15c each; 6 for 75c.

VIOLAS, HARDY. Yellow, white and blue. **15c each; 6 for 75c.**

YUCCA filamentosa (Adam's Needle). Among hardy plants there is nothing more effective and striking. It is also indispensable for the rockery. **Each, 35c; 3 for \$1.00.**

ALYSSUM (Rock Madwort). Very popular for beds, borders and winter flowering; of easiest culture and very free blooming.

ARABIS alpina (Rock Cress). Pure white flowers produced in dense masses; splendid for border and rockery work.

ANEMONE japonica (Japanese Anemone). Valuable plants suitable for massing or single specimens.

AUBRIETIA (Rock Cress or False Wall Cress). One of the daintiest and most delicately beautiful of all dwarf, creeping plants for carpeting beds or rockeries.

DIANTHUS plumarius (Clove Pinks). For border or rock garden. It will bloom continuously if flowers are cut off when they begin to fade.

GYPSOPHILA repens (Baby's Breath). Beautiful trailing plant.

HEPATICA coerulesca. A pretty native, spring flowering plant with blue flowers.

IBERIS (Hardy Candytuft). Most desirable dwarf plants, 8 to 10 inches, with evergreen foliage, which is completely hidden with dense heads of flowers early in the spring.

IRIS pumila. These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower beds or planting in front of the tall Irises.

MYOSOTIS alpestris (Alpine Forget-me-not). Splendid for naturalizing in dry places; also for beds, borders and rockeries.

Phlox subulata.

Phlox Bargain Extraordinary

choice from 25
magnificent kinds,
10 prepaid for only

\$1

None of the hardy perennial plants are more gorgeous or more easily grown than these. They can be successfully planted in any garden soil and multiply rapidly. They produce magnificent spikes of showy, lasting and fragrant flowers, year after year, with comparatively little care. They are the main standby for harmonious garden color through the difficult month of August. Give plenty of water at the approach and during the blooming season. Every Phlox we offer in this list is two-year-old, field grown, and is heavily rooted.

Three Phlox of Outstanding Merit

Of all of the Phlox that we have ever grown, these three varieties are by far the most outstanding.

B. Comte. This is a deep red Phlox with a distinct French purple shade. It is very dwarf in its habits, attaining a height of about 2 feet.

Marshal French. It is the best red that has ever been grown. It is carmine in color, retaining its color over a period of many days, and in as far as we have observed it has never had a fault.

Milly Von Hoboken. This is an outstanding delicate pink Phlox retaining its color throughout the hot days and serving as a delightful blend in a garden of Phloxes.

FREE

With every order of 25 Phloxes at \$2.25 we will send you, absolutely free, the three outstanding varieties shown below.

Milly Von Hoboken. 25c each.

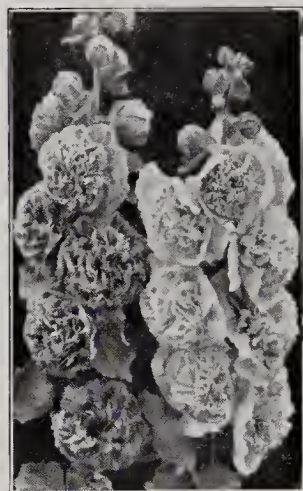

B. Comte. 25c each.

Marshal French. 25c each.

Krider's Hardy Flowering Plants

Coreopsis.

Double Hollyhocks.

Canterbury Bells.

Hardy Chrysanthemums.

Perennial flowers give the satisfaction that comes from permanency. Year after year without any special care they bloom for you. If varieties are selected with regard to time of blossom, flowers from early spring to late fall may be had. Remember the old-fashioned garden of your grandmother? It can be perpetuated in your rockery.

Price of all perennial clumps unless otherwise noted: Each, 15c; \$1.50 per doz.; \$10.00 per 100. Select as many varieties as you like to make up your dozen or hundred.

ACHILLEA (Milfoil or Yarrow). Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries; the taller varieties as border plants.

A. millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads on stems 18 inches high. Effective on edge of shrubbery or in border.

A. ptarmica, The Pearl. Pure white, double flowers all summer. Prized for cutting.

ALYSSUM (Rock Madwort). Very popular for beds, borders and winter flowering; of easiest culture and very free blooming.

ANCHUSA (Alkanet). For producing a mass effect of brilliant blue the Anchusas cannot be surpassed.

AQUILEGIA (Columbine). As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose.

DELPHINIUM (Larkspur).

Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. They will bloom from spring until fall. We have dark blue, light blue, Gold Medal hybrids.

ASTILBE (Spirea). These stately Astilbes producing their graceful feathery spikes of flowers during June and July succeed best in a partially shaded position in rich, preferably heavy soil where they will not lack for moisture. Four colors.

DIANTHUS (Pinks). Hybrid Garden Pinks. Without the spicy fragrance of the Hardy Pinks a garden is incomplete. Their perfect form and rich coloring make them great favorites for summer bouquets. June.

DIELYTRA or **DICENTRA** (Bleeding Heart). A hardy perennial with heart-shaped, rose colored flowers in drooping spikes. **Each, 35c.**

CAMPANULA (Bellflower). A large and varied family of the greatest value. They are of the easiest culture, thriving in any ordinary garden soil.

C. medium (Canterbury Bells). Blue, rose and white.

Columbine.

Platycodon.

For the Garden and Rockery

HARDY CHRYSANTHEMUMS. The inclusion of Hardy Chrysanthemums in your plantings makes it possible to have the garden bright with flowers after the majority of hardy herbaceous flowers are past. They are also valuable for cut flowers. The varieties offered below have been carefully selected and will give a flowering period of two months, from the middle of September until the middle of November.

Varieties Hardy Chrysanthemums—Fred Peel; Flora; Autumn Glow, red; Snowdrop, white; Mitzi, brilliant yellow; Indian Copper, red; Holmstead.

CHRYSANTHEMUM MAXIMUM (Giant Moonpenny or Shasta Daisies). Alaska. Extra large.

PAPAVER orientale (Poppy). These are the regal representatives of this popular genus. No plant is more brilliant in late spring or early summer than the Oriental Poppy, with its large flowers, silken petals and flaming colors. Whether planted singly or in masses their large flowers and freedom of bloom render them very conspicuous in any location. Easy of culture and a considerable range of color. Orange; Mrs. Perry, salmon-rose; Bracteatum, rich blood-red.

Hibiscus.

COREOPSIS grandiflora (Tickseed). An improved variety with large, bright yellow flowers; one of the best hardy plants. Fine for cut flowers all summer long.

DIGITALIS (Foxglove). For stately and picturesque beauty it is not to be surpassed, and planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself

from self-sown seed, it may be treated as a perennial.

GAILLARDIA grandiflora (Blanket Flower). Base of petals is scarlet-crimson, bordered golden yellow. A most beautiful combination; useful in assorted bouquets; valuable for table decoration.

GYPSOPHILA paniculata (Baby's Breath). A beautiful old-fashioned plant possessing a grace not found in any other perennial and attracting the eye of everyone.

HIBISCUS (Mallow Marvel). Improved new hardy giant-flowering Marshmallows, the most free-blooming of all perennials; rich, gorgeous and hardy as an oak.

HOLLYHOCKS. The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect.

LIATRIS (Blazing Star or Gay Feather). It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time.

PLATYCODON (Balloon Flower). June to October. Large, showy, deep blue flowers. Good for rock garden and border.

PYRETHRUM (Painted Daisy). Daisy-like flowers in white and colors. The flowers are borne on long stems and are fine for cutting. Fernlike foliage.

Delphinium.

Pyrethrum.

Foxgloves.

Statice.

Shasta Daisies.

The GREAT FOUR of

Red Northern Spy.

Jonathan or Black Ben Davis. The same is true with the Red Baldwin. It now has a color equal to the Jonathan. It is a larger apple than the Jonathan. It has no bad faults and it comes into bearing at six years of age.

For the past twenty years, nurserymen over the country have been making endeavors to obtain apples that are red in color, that come into bearing early, and that still retain the quality of some of the old-fashioned apples of our Grandfather's orchard. The greatest advancement in apple culture in the past ten years has been made in the 4 varieties illustrated on this and the opposite page, namely Red Baldwin, Red Delicious, and the New Red Cortland. Color is the best selling attribute in any apple. No greater apple ever grew than the Old Northern Spy but it had 2 faults; it took years for it to come into bearing and it was too pale a green to be attractive on the market. The new Red Northern Spy comes into bearing in four to six years and has a rich red color equal to any

NEW RED NORTHERN SPY

Imagine all the splendid qualities of the genuine Northern Spy, its unusual and delicious flavor, its great cooking and baking quality, its hardness and wonderful productiveness, and add to these outstanding features, an apple of solid deep red color, borne on a tree which comes into bearing in six years instead of having to wait eighteen, and you get some idea of the immense good that nurserymen have wrought in perfecting the New Northern Spy. **We offer these in 2-year, No. 1, 4- to 6-ft. trees, within the reach of all our customers, for 50c each; \$4.00 per 10; \$35.00 per 100, prepaid at an additional cost of 5c per tree.**

RED BALDWIN

This famous Apple for many years was the standard of the apple industry due to its immense yielding qualities and the firmness of the fruit itself. For the past 20 years, nurserymen have been experimenting, grafting continuously from trees that excel in red color, until now we have a strain, the fruit of which is as red as the Jonathan and almost double in size. These trees also come into bearing in six to eight years. How often we have heard orchardists say that if they could only plant Baldwin, Northern Spy, King of Johnson county and some of the good old apples of the early days and hope to live to see them come into bearing, how pleased they would be. Their wish can now be realized in these newer, redder types of these old varieties. We urge our customers to plant some Red Baldwin.

We offer them in 2-yr., No. 1, 4 to 6 ft., each, 50c; \$4.00 per 10; \$35.00 per 100, prepaid at 5c per tree additional.

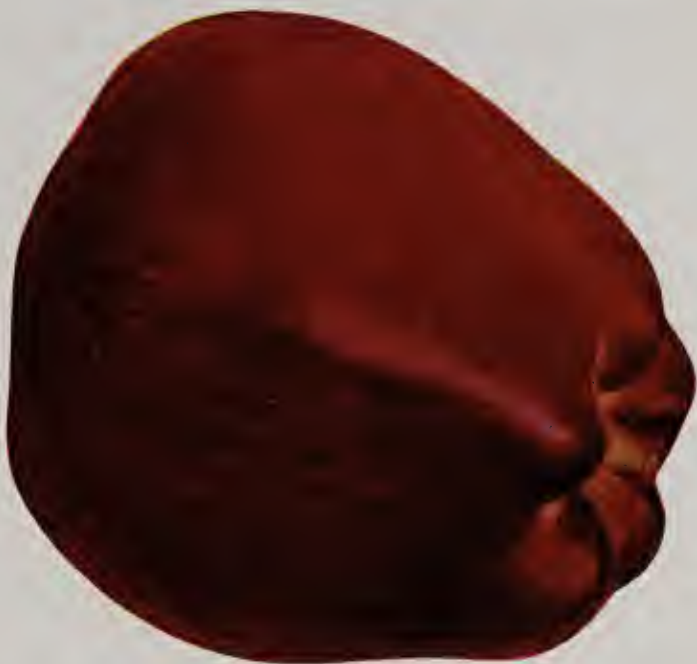

Red Baldwin.

the RED APPLE world

We are offering these varieties to our customers at practically no advance in prices. We want you to get a start of these wonderful varieties. We have quite a stock for next spring which costs but little more to grow than the common varieties and we are herein passing them on to our customers.

Common Delicious.

Red Delicious.

RED DELICIOUS

The sensational New Red Delicious which we are offering to the trade is a marvelous improvement over the common Delicious in that it is a much deeper red color without stripes, even in the heavily shaded portions of the tree, where the foliage is very thick, the color is outstanding, where common Delicious would be striped red and partly green.

This tree is typically Delicious as to leaf, bark, and general shape, and the fruit is in every particular a high quality Delicious excepting color, which is an outstanding solid red—the most beautiful Delicious we have ever seen. Although this new Delicious colors 2 to 3 weeks earlier than the common variety, it does not ripen any sooner and can be picked at the same time.

Many growers have been known to leave their Delicious crop on the trees too long in the hope that a deeper red might be attained and the fancy quality of the apples thus be improved, however, the result has been that they become over-ripe, mealy, and reach the market in poor condition.

Such is not the case with the New Red Delicious, which can be picked while hardly ripe and be assured of a full coloring which will put them in the extra fancy grade and bring top prices. This also makes better keeping qualities for storage. The New Red Delicious should be included in every fruit order at the following low prices:

2-year, No. 1, 4 to 6 ft., 50c each; \$4.00 per 10; \$35.00 per 100, prepaid at 5c per tree additional.

NEW RED CORTLAND

New Red Cortland originated and developed by the New York Experimental Station, is a cross between Ben Davis and McIntosh. The good qualities of both parents have been combined and the weak ones eliminated.

From Ben Davis, Cortland has inherited the quality of clinging to the tree, and the ability to withstand handling; from the McIntosh it has taken that fine flavor for which this variety is noted.

The tree is a fine grower and comes into bearing very early. We have seen 2-year-olds producing two or three apples per tree.

This New Red Cortland ripens in the late fall and the fruit is large, round to conical in shape. Color a beautiful dark red with purplish bloom. Flesh is fine grained, crisp, and juicy, white and firm. The trees are large, hardy, healthy, and sure croppers.

2-year, No. 1, 4 to 6 ft., 50c each; \$4.00 per 10; \$35.00 per 100, prepaid at 5c per tree additional.

New Red Cortland.

Krider's Apple Trees

McIntosh Red.

Apples are going to be valuable in the near future, they bring a handsome price now and when the old orchards are gone they will nearly double the price received now and a good Apple orchard will be more valuable than an orange grove. True, some of us will not live to reap the benefits, but our children can not have a greater inheritance than a thrifty, bearing orchard, which will guarantee them a fine income annually.

We grow forty varieties of Apples, each one having certain characteristics which render them valuable. Those marked with an asterisk (*) are such as are most valuable in Indiana.

PRICES OF APPLES AND CRAB APPLES—Whole Root Process:

Prepaid at 5c per tree.

| | Each | 10 | 100 |
|------------------------------|--------|--------|---------|
| No. 1—2 yr., 4 to 6 ft. | \$0.35 | \$3.00 | \$20.00 |
| No. 1—1 yr., 3 to 4 ft. | .25 | 2.00 | 10.00 |

We can furnish Dwarf Apples at the same price as Standard.

We can furnish 6-7 ft. trees for city planting at 75c each. Prepaid at 5c per tree.

Summer Varieties

***Early Harvest.** Size medium, shape roundish, usually more or less oblate, smooth, bright straw color when ripe; flesh nearly white; flavor rather acid; fine. Season July. Productive. Needs rich cultivation to be fine. Good throughout the North and Southwest.

***Yellow Transparent.** Medium, white, changing to lemon-yellow, smooth, waxen surface; of good quality, with crisp flesh; very early, and, for an early Apple, an unusually good keeper. Valuable for market. July and August.

***Chenango.** A beautiful Apple, and one of fine flavor. Fruit somewhat long and pointed, yellowish white striped with red, ripening continuously during a period of several weeks from late August on. Tree is very hardy and thrifty, starting to bear when young. One of the finest for the home orchard—ideal for dessert or for cooking.

***Red Astrachan.** The earliest and best red Apple. Fruit of good size, dark red. Vigorous, hardy and productive.

Fall Apples

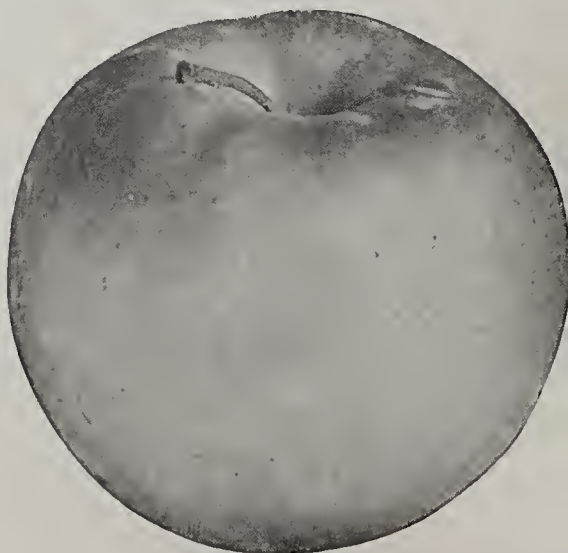

***Wealthy.** The most dependable and widely planted fall Apple. Bright red, striped. Medium to large in size. Hardy and a free grower.

***Maiden Blush.** A medium to large pinkish Apple. Very firm, white flesh. Acid flavor; vigorous and productive.

***Duchess.** Fruit large, roundish. Splendid cooker. August and September.

Fameuse (Snow Apple). Medium deep crimson, white flesh. October.

Wolf River. One of the largest Apples grown. Color yellowish green, splashed with red. October.

Yellow Transparent.

Winter Varieties

***Delicious.** Large, with surface almost covered with a most brilliant dark red, blending to a golden yellow at the blossom end. Flesh fine grained, crisp, juicy, melting and really delicious. The tree is a hardy and vigorous grower and forms a strong, beautiful head, capable of bearing enormous loads and bears about the fourth year after planting. In keeping qualities it ranks with the best, coming out of storage in March and April in perfect condition.

***Grimes Golden.** The standard of excellence, of the best quality, rich golden color. Flesh is yellow, very firm, crisp but tender, rich, aromatic and juicy. Medium to large. An ideal dessert and cooking Apple. Tree is hardy, vigorous, upright grower, and a heavy, regular bearer. From November to March.

***Jonathan.** A beautiful red Apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

Gano. Similar but superior to Ben Davis. More color and even in size. Keeps until March.
Golden Russet. Vigorous growth, medium russet, very good keeper. Sub-acid. November to April.

Hubbardston (Nonesuch). Large, striped yellow and red; bears well every year. November to March.

King (Of Tompkins County). One of the largest. Very productive. November to March.

McIntosh. Medium, highest quality, deep crimson, sub-acid. October.

N. W. Greening. Excellent keeper; early bearer. Keeps until May following picking.

Ontario. A new winter Apple of good keeping and early bearing qualities. Rich red in color.

R. I. Greening. Large yellow, abundant yielder. March to April.

Stayman (Improved Winesap). Larger and more prolific. Fine keeper.

Tolman Sweet. Medium pale yellow, the most valuable baking Apple. Keeps until April.

Tulphocken (Fallawater). Large, green, very juicy. October.

Wagener. Good size, deep red, flesh firm. One of the first varieties to bear. November.

Winter Banana. An excellent market variety. Fruit has a flavor that cannot be described. Flesh golden yellow. November.

Winter Rambo. Medium flat, streaked red and yellow. Hardy and productive. November.

York Imperial. Large red. Bears within four years. Good shipper. November to March.

Yellow Bellflower. An old-fashioned Apple too well known to need description. Has many good qualities and worthy of a place in every orchard.

Jonathan.

Wealthy.

Crab Apples

Prices of all varieties same as Standard Apples.

For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

Hyslop. Large; dark crimson, with bloom; very showy. Tree very hardy; late.

Transcendent. The largest Crab Apple. Red; showy; excellent. September to October.

Choice

New
Billmeyer.

The Peach holds a place second only to the apple in the United States. It ripens over a long period and with proper selection of varieties a succession of fruit may be had throughout the summer and early fall. In a general way it may be said that the standard varieties of Peaches have a wider range of adaptability than the majority of apples and thrive on thinner soils; for example; Elberta is the leading variety in all Peach growing sections of the country—but no single variety of apple tree occupies the same position in its class as does Elberta. This fact is ample proof of the adaptability of the Peach.

Paradichlorobenzene. A sure cure for the peach borer. This remedy can be purchased from your druggist. If applied in September the following directions should be followed.

Remove the dirt from about the tree in a circle of 12-inch radius, apply paradichlorobenzene in a circle about 4 inches from tree, using a tablespoon to a 5-year tree, cover by mounding the dirt about the tree. The gas resulting from this preparation is a sure cure for the borer and will prolong the life of a peach tree five years.

| | Each | 10 | 100 |
|------------------------|--------|--------|---------|
| No. 1, 4 to 6 ft. | \$0.25 | \$2.00 | \$18.00 |
| No. 1, 3 to 4 ft. | .20 | 1.50 | 15.00 |
| No. 1, 2 to 3 ft. | .15 | 1.20 | 10.00 |

Prepaid at 5c extra per tree.

Early and Midseason Varieties

Big Red (Freestone). Larger than Elberta. Rich red all over; flesh yellow, rich, fine grained and juicy. Stands shipping well. Tree hardy, vigorous grower, having large spread. Ripens middle of September.

Billmeyer. A very large yellow freestone Peach ripening after the Early Crawford. It has a dark red flush and very small pit.

Carman. In this new, hardy, rot-proof Peach, almost as large and fine as the Elberta itself, we have a Peach of great market value; a large, roundish Peach, with pale yellow skin, red blush on sunny side; white flesh; tender and melting; rich, sweet and superior flavor. A big, early, yellow-skinned Peach of high quality is sure to be in great demand. August.

Champion (Free). Large, round, quite regular; yellowish white, mottled with red on sunny side; flesh white with red at the pit; one of the best in quality. For nearby market and home use it is the best variety we know of. A good healthy grower and hardy in fruit bud. Fruit ripens from 20th of August to first of September.

Crawford's Early (Free). Large, roundish, bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

South Haven.

Peaches

Early Elberta (Free). Larger than Elberta, though identical in form; bright yellow with red blush; flesh yellow, finer grained and sweeter than Elberta; ripens a week to ten days before Elberta; good shipper. Tree strong grower, hardy, good bearer. Last of August.

Elberta (Free). The great market Peach, perfectly hardy in the North and is believed to be the best all around Peach; color lemon-yellow with blush on sunny side; flesh pale yellow, tender and juicy; tree vigorous; a good shipping Peach. September.

J. H. Hale (Free). Fruit averages one-third to one-half larger than Elberta; ripens about five days earlier and is much superior in flavor. Color a beautiful golden yellow with deep carmine blush. Seems to do well over a wide range of territory. It is well worth planting. September first.

Kalamazoo (Free). Medium to large, oval, yellow striped with red and a thin bloom; flesh yellow, red at the pit, rich, vinous and of good quality. A valuable sort. September first.

Rochester (Free). Early midseason. Color lemon-yellow changing to orange-yellow, blushed with deep, dark red. Skin thick, tough. Flesh yellow stained with red near the pit. Very juicy, tender and melting. Sweet. Highly flavored. Very good in quality.

South Haven. The great hardy Peach for cold regions, stands 10 degrees colder weather than any other Peach grown. Large, yellow, freestone. Large as Elberta and a week earlier on the market. Of all Peaches for Indiana markets, this rules supreme. Plant for commercial purposes: South Haven, Elberta, J. H. Hale. All yellow, all freestone, all money makers.

Late Ripening

Crawford's Late (Free). Large, roundish oval, yellow with broad red cheeks; flesh yellow with red at the pit; melting, vinous and very good. Late September.

Gold Drop (Free). The almost translucent golden colored flesh of this Peach renders it exceedingly attractive in market, where it sells at highest prices. The tree is hardy and bears early; profitable. Late September.

Wilma. The fruit is large as Elberta, its parent, but not quite so elongated; color very much better and ripens about 10 days later. September 25th. Quality much better. Wilma sold for double the price of Elberta and brought the highest price of any peach on the market this season.

J. H. Hale.

New Wilma.

Apricot Trees

Ripening as it does between cherries and peaches, usually about the month before the early peaches, the Apricot is a most welcome fruit, tempting and delicious. No garden should be without a few trees. In addition to its value as fresh fruit it is a superior fruit for canning and drying, vast quantities being used for these purposes every year. There is always a market for Apricots at good prices, and the planter need have no fear of over-production.

Prices of all varieties of Apricot trees prepaid. Largest size, 2-yr., 4 to 5 ft., 75c each; 10 for \$7.00. Medium size, 2-yr., 3 to 4 ft., 60c each; 10 for \$5.00.

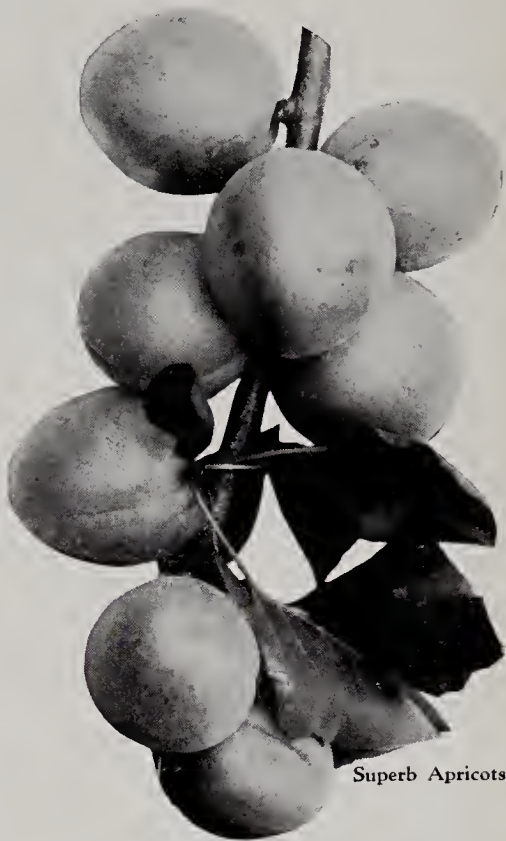

Alexander. Russian. An immense bearer. Fruit large, oblong, yellow, flecked with red; sweet and delicious.

Budd. Russian. Large, white with red cheek; sweet and juicy; strong grower, good bearer. Late.

Gibb. Russian. Medium yellow, sub-acid, rich and juicy, the best early sort.

Moorpark. One of the largest and finest Apricots. Yellow with red cheek. Flesh orange, sweet, juicy and rich; parts from the stone. Very productive.

Superb. Russian. Medium, roundish oval, smooth, light salmon with numerous red or russet dots, flesh yellow, firm, sub-acid and good; tree hardy and productive. Middle of July.

Superb Apricots.

Quinces

Quince trees can be planted on low, damp, heavy soils where other fruits do not thrive. They require very little attention and are very profitable for market. No home garden is complete without a few Quince trees.

Price of Quince trees: 2-yr., 4 to 5 ft., 75c each; \$8.00 per doz. 2-yr., 3 to 4 ft., 60c each; \$6.00 per doz., prepaid.

Champion. Good bearer; very large; good keeper; very productive. Bears extremely young.

Orange (Apple). Large; bright golden yellow; excellent flavor. Fine for domestic use. October.

Asparagus

The first garden vegetable of spring; it is a great delicacy and comes in just when it is most needed. One hundred roots will supply a small family and will last for years. Set the plants about 18 inches apart in the row. Spread roots out in bottom of hole or furrow and fill in as plant grows, so that roots will be about 4 inches deep.

ASPARAGUS—2-year-old—Prepaid:

| | Doz. | 100 | 1000 |
|--|---------------|---------------|---------------|
| Martha Washington | \$0.25 | \$1.00 | \$8.00 |
| Early French Giant Argenteuil | .20 | 1.00 | 6.00 |
| Improved Palmetto | .20 | 1.00 | 6.00 |
| Columbia Mammoth White | .20 | 1.00 | 6.00 |
| Conover's Colossal | .20 | 1.00 | 6.00 |
| Martha Washington, 1-year-old | .20 | .50 | 3.50 |

Asparagus,
Martha Washington.

Rhubarb

Victoria. The old standard variety; large stalks. **\$1.00 per doz.; \$3.00 per 100, prepaid.**

Linnaeus. One of the leading varieties grown here. Stalks not as large as Victoria, but earlier. **\$1.00 per doz.; \$3.00 per 100, prepaid.**

Miller's Cream. For many years an old market gardener near Bristol had the early trade of Elkhart on pie plant; he had the largest, earliest and the best flavored pie plant that came to the city. Pies made from it had the flavor of peaches and it was called peach flavored. Since his death we have succeeded in obtaining the entire stock and have at this time 10,000 stalks. We are offering this to our customers at the same price as the common kind. Be sure and send for a dozen of this variety in your order. We call it "Miller's Cream" and will give \$25.00 for a dozen stalks that will excel it in size, season and quality. **\$1.00 per doz.; \$3.00 per 100, prepaid.**

Miller's Cream
Rhubarb.

Plums

PRICES ON PLUM TREES PREPAID.

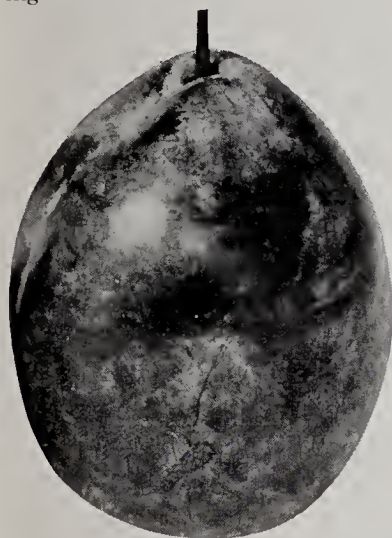

No. 1—5-7 ft., 75c each; 10 for \$7.00; 100 for \$60.00. 4-6 ft., 50c each; 10 for \$4.50.

Plum pudding, yum, yum, plum preserves and plum pie. Do you have them in your house? Would you if you grew your own Plums? Why not? A Plum tree is hardy. Takes little room and produces abundantly.

No other fruit tree, unless it is the cherry, will produce more abundantly than a Plum tree. Although they will yield crop after crop despite neglect, Plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of Plum production has received much attention in late years but the supply still falls far short of the demand. In general, Plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for Plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of Plum produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties:

Monarch Plums.

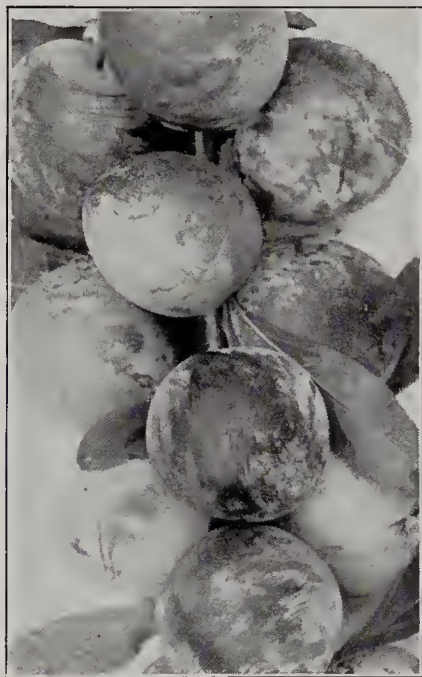

Bradshaw Plum.

Abundance. A nearly pinkish red Plum; ripens in mid-season. Thrives everywhere. A regular and heavy bearer. No orchard is complete without it.

Bradshaw. A very large and fine early Plum; dark violet-red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all Plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

Burbank. Adapted to any soil and climate where any other Plum is grown. A profitable commercial Plum. Requires little care. Ripens in midseason.

Burbank Plums.

Lombard. Medium; violet-red; juicy, pleasant; adheres to stone; valuable market sort; hardy; productive.

Monarch. Fruit dark purple, covered with a thin bloom; large size specimens measuring six inches in circumference; flesh pale greenish yellow, parting freely from the stone, juicy, with a pleasant flavor. A leading market sort. Vigorous grower. September.

Reine Claude. Small; yellow-green; flesh pale green, melting, luscious and of best quality. Mid-August.

German Prune. Large, dark purple, sweet. One of the best for canning. Excellent for drying. Plant a few trees and dry your own for winter use. Ripens in September.

The Krider Nurseries, Middlebury, Ind.

Dear Mr. Krider:

I wish to thank you for the catalog that I just have received from your company. I am glad to see that your prices are still lower than they were last year, although I fail to see how you do it.

I must confess that when I sent you my order last year, I was very skeptical on account of your low prices, but after receiving my roses from you, I soon changed by mind. I have found your shipments to be prompt, your packing good and your stock of the best.

Roses are my hobby, I want to grow the best that I can afford. Owing to the fact that my garden space is very limited, I can't grow as many as I would like; I have at present about 70 roses, comprising some 50 varieties. Some of these roses came from some of our best known rose growers in the East and cost me a good deal more than you are asking for your roses, but I have yet to see better stock than that I have received from your company. It is indeed a pleasure to recommend your company to my friends.

Thanking you for your kind attention and wishing you success in the future, I am

Yours truly,

FRANK WALSH

61 Burgess Ave., E. Providence, R. I.

Cherries

In planting a Cherry orchard care should be taken not to plant the trees too close together; select a dry soil for the Cherry, as a rule, although it is so hardy a tree that it will thrive in a great variety of soils, yet a good sandy or gravelly loam is best. Use same care in planting as other trees.

Orchardists are resorting more and more to the planting of varieties of Cherries that are strong pollenizers. Experience seems to demonstrate that such varieties as Black Tartarian, Bing, and Schmidt's Biggarreau are the best varieties to use for this purpose. Usually about one in every ten trees has proven to be the right proportion to use of these pollenizers.

Bing.

Sweet Varieties

Bing. This grand new black Cherry was originated by Seth Luelling, of Milwaukee, Ore. Almost as large again as the Black Republican; flesh very solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety. First of July.

Black Tartarian. Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

Windsor. Tree upright, and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

Yellow Spanish. Large, handsome, sweet Cherry with light red cheek, firm and delicious. Tree vigorous in growth and productive. Late June.

Governor Wood. Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

Napoleon or Royal Ann. A beautiful Cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

Schmidt's Biggarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine flavor. Fruit grows in clusters. It is an excellent shipper. July.

Yellow Spanish.

We sell 5 at 10 rate; 50 at 100 rate; 500 at 1000 rate. We sell 5-6 ft. Cherry trees, heavy planting size, for city trade at \$1.00 each.

PRICE OF CHERRY TREES:

| | Each | 10 | 100 |
|--|--------|--------|---------|
| First class, 4 to 5 ft., 5/8 to 3/4 inch | \$0.50 | \$3.50 | \$30.00 |
| First class, 3 to 4 ft., 3/8 to 5/8 inch | .40 | 3.00 | 25.00 |

Prepaid at 5c per tree.

Duke and Morello (Sour)

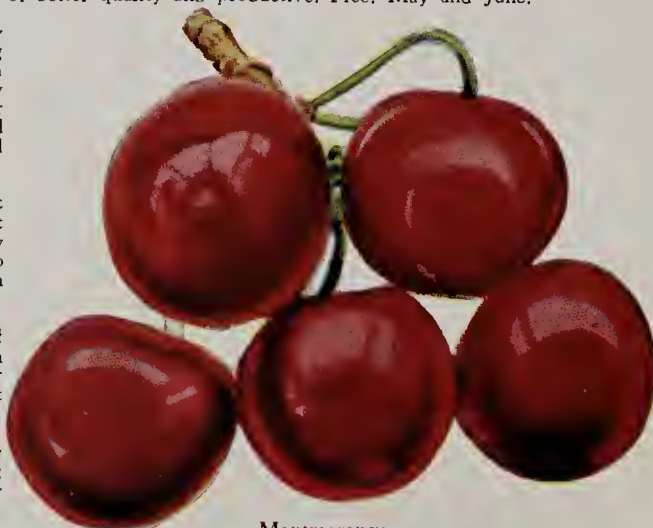

Dyehouse. This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond, is of better quality and productive. Free. May and June.

Early Richmond. Everywhere the most popular. Tree strong, thrifty grower, making a large symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

Large Montmorency. A fine, large, light red Cherry of the Richmond class, but larger and more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

May Duke. A large, light red Cherry of most excellent quality. They are between a sweet and a sour Cherry. Fine for canning. The tree is a strong, upright grower.

English Morello. Medium to large, roundish; dark red, nearly black when ripe; flesh purplish red, meaty, juicy, slightly astringent and good; very productive. August.

Montmorency.

Standard Pears

The home orchard is not complete without Pears and they are a very profitable commercial crop in nearly all parts of the country. Pears will live on a variety of soils, but succeed exceptionally well in a hard clay soil. Tilling and fertilizing are advisable to a certain extent, but should not be carried far enough to produce too vigorous a growth. The quality of the Pear is much improved by picking before maturity and by proper ripening indoors.

Big profits are realized from Pear orchards—our trees produce first grade fruit.

PRICE OF PEAR TREES:

Select, 4 to 6 ft., 50c each; 10, \$4.00; 100, \$30.00. Select, 3 to 4 ft., 30c each; 10, \$2.50; 100, \$20.00, prepaid at 5c a tree additional.

Bartlett. Large size, with beautiful blush next to the sun, buttery, very juicy and high flavored; tree a strong grower and a young and abundant bearer. August and September.

Clapp's Favorite. Large, ovate; skin thin, pale yellow, marked with crimson and fawn colored dots; flesh white, fine grained, juicy, sweet, buttery, rich and melting; very vigorous, upright grower. September. Very desirable in all sections.

Bartlett.

Seckel. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

Flemish Beauty. One of the best varieties of Pears on account of its hardiness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in September and October.

Winter Pears

Garber. Equally as hardy as Le Conte or Kieffer; of same class of Pears. The growth and appearance are very much like Kieffer; ripens one month sooner and of better quality.

Seckel.

Lincoln Coreless. Originated in Lincoln County, Tenn. Fruit very large, handsome appearance, good quality and very few, if any, seeds. Almost clear of core and seeds, whence its name. One of the best keepers among winter Pears. Golden yellow; tree a good grower and very productive. Has never been known to blight.

Kieffer's Hybrid. Originated near Philadelphia. Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermillion cheek; very juicy, with a musk aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best Pears for canning or preserving. As near blight proof as a Pear can be called.

Duchesse d'Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet; flesh white, rich and good quality. An all around profitable market Pear. October and November. **Extra select trees of above, 5 to 7 ft., 75c each. City planting size.**

Flemish Beauty.

Agawam.

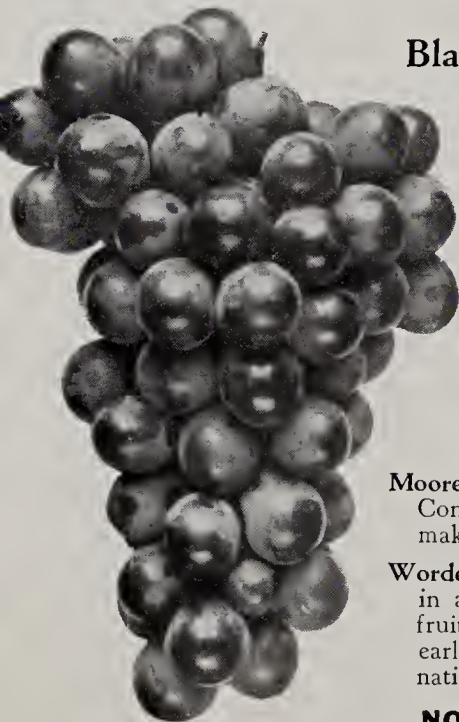

Delaware. The bunches are small, compact, are sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

Salem. Bunch large and compact; berry large, of a light chestnut or Catawba color, thick skin, perfectly free from hard pulp; very sweet and sprightly with a most exquisite aromatic flavor; as early as Worden; keeps well.

White Varieties

Niagara. Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord. **Each, 10c; 100 for \$6.00.**

Pocklington. Seedling from Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildews in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

Concord.

Selected Grapes

Hardy varieties—prime favorites everywhere.

It is one of the oldest fruits in existence, yet the demand seems to grow every year beyond all expectations. There is in the Grape the good savory qualities that make it popular for eating as fresh fruit, and the uses to which it can be put in canning and jelly making are almost without number. Also the best of the rich wines are pressed from Grapes.

Grapes can be grown by anyone who has a garden or yard, and a little time to give to it.

Price, No. 1 vines, except where otherwise noted, 15c each; doz., \$1.50; 100 for \$10.00. All vines heavy, 2-year-old. Special prices on Niagara and Concord. All prices pre-paid.

Red Varieties

Agawam. Bunch large, shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive and one of the best of its class.

Brighton. Bunch large, shouldered; berries medium to large, round, dark red, tender, very little pulp, juicy, slightly aromatic and very good. Ripens early.

Niagara.

Black Varieties

Campbell's Early. A new, very large and fine early black Grape. Strong, vigorous, hardy vine with thick, healthy leaves; clusters very large, usually shouldered, compact and handsome; berries large, nearly round, black, rich, sweet, very good; skin thin; seeds few and small, parting easily from the pulp; good shipper; ripens very early but remains sound on vines for many weeks. This makes it one of the most satisfactory and profitable market sorts to grow.

Concord. One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round, almost black with blue blooms, juicy, buttery and very sweet. **Each, 10c; 100 for \$6.00.**

Moore's Early. A large Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

Worden. Seedling of the Concord which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native Grapes.

NOTE.—1-year, No. 1 vines of Concord and Niagara at 6c each; \$3.00 per 100.

Raspberries

Loose soils produce the best Raspberries. Partial shade is no hindrance to productiveness, as the natural habitat of the Raspberry is in lower ground, filled with leaf mold and partly shaded. For this reason along higher fences and in between the young orchard trees, Raspberries are likely to thrive. Allow not more than five good canes to develop to the plant, and pinch out the tops of these when they attain a height of 2½ to 3 feet in order to encourage laterals.

Both red and black Raspberries are sold only in bunches of 25 plants. Less than this number is hardly worth the trial.

Black Varieties

Prices: 90c per 25; \$2.00 per 100; \$15.00 per 1000, prepaid. (Except Quillen).

Quillen. This is the greatest variety of black Raspberry grown in the United States today. Ripens about two days later than Cumberland; is the largest Blackcap that has ever been grown here. It originated south of Indianapolis, a cross between Cumberland and Hopkins. We highly recommend this variety for several reasons: First, it has never shown any diseases in the eight years we have had it on our grounds—no anthracnose, no mosaic. The original field planted eight years ago is in a clean, healthy condition. All the Cumberland fields invariably pass out in three years time of the anthracnose. If you want the best, get a start of Quillen. **\$1.00 per 25; \$3.00 per 100; \$20.00 per 1000, prepaid.**

Cumberland. Largest black Raspberry known; unusually strong grower, perfectly hardy. The most profitable Raspberry grown.

Plum Farmer. The most profitable early market sort; maturing the entire crop in a very short period. The berries are large, thick-meated; firm; attractive.

New Logan. Of Ohio origin, this new blackcap is gaining much favor among berry growers. Its quality and productiveness are excellent, probably equal to Cumberland, but its paramount value lies in the week or more earlier cropping season.

Red Varieties

Per 25, \$1.00; per 100, \$3.00; per 1000, \$15.00, prepaid, except as noted.

CUTHBERT. Crimson, large, conical, firm and juicy. The canes are upright, strong and vigorous. Hardy. The standard late red market and home variety; popular and unsurpassed.

KING RED. Bright scarlet, sweet and melting. This early red is the best of its season because of hardiness, productiveness and general good qualities. Ripens two weeks before Cuthbert.

LATHAM. The Finest Red Raspberry Ever Produced. There are so many fine qualities in the Latham that we never know where to start. First, it is extremely large in size, larger than all of the common reds, and when ripe is a beautiful bright red color. Then, in addition to this unusual size, it is the hardiest of all Raspberries, giving fine results even to the Canadian line. Its flavor is truly delicious and the crop is remarkably heavy, sometimes extending over a month. In every way, the Latham stands supreme. Prof. C. V. Holsinger, Extension Professor of Horticulture of the Iowa State College, Ames, Iowa, says: "I only hope you will be able to grow plants enough to put this berry in the hands of as many people as possible." Latham Raspberries are a beautiful, thrifty lot, guaranteed to be entirely free of the mosaic. They have been rigidly inspected three or four times by experts who pronounced them supremely healthy, and mosaic free. Order your wants early. **Bargain price, \$1.00 per 25; \$2.00 per 100; \$16.00 per 1000, prepaid.**

Latham Raspberries.

Quillen Raspberries.

CHIEF. A new product from Minnesota achieved after 14 years experimenting, with the purpose of replacing the old King by a superior type of Latham breeding. Chief will not rival Latham, but supplements it by ripening 10 days earlier and so holding that wonderful type for picking an extra long season. In fact, Chief fills that deplorable gap for fresh table fruits between Strawberries and the other Raspberries. Bright red, "no crumbling," ships well, tastes delicious, and pays its way with extraordinary crops. **25 for \$1.00; 100 for \$3.00, prepaid.**

ST. REGIS. One of the most valuable of all late introductions in the line of red Raspberries; the habit of growth is a bushy nature; will produce berries that first year in the fall, and a full crop the following spring and again in the fall. St. Regis resembles the Early King; its fruit is similar to that variety in quality, flavor and appearance. In September, long after Raspberries are out of season, St. Regis will bear a full crop of fruit, which commonly sells for seven to eight dollars for a 24-pint crate. If you have a market at hand where you can dispose of the fruit, you will find St. Regis a very profitable investment when grown on a commercial scale. If you have not the time or the ground to grow St. Regis for market, be sure to plant at least few bushes in the garden and keep your table supplied with all you can use. **\$1.00 per 25; \$2.00 per 100, prepaid.**

Strawberries

Premier (Howard 17)

No variety ever introduced to the public has received as much praise as the PREMIER. No variety has ever been grown in such quantity, and no variety has made anything like as much money for the growers. And while there are now being introduced some marvelous varieties, which are almost sure to take the place of the PREMIER, it is going to be hard parting between growers and their old friend PREMIER.

PREMIER has paid off thousands and thousands of old mortgages; purchased and paid for new homes, new barns, automobiles by the million, and the many other needed things too numerous to mention. And we predict that it will be grown in a large way for a great many years to come. For the past twelve years we have made PREMIER plants our specialty. We have grown them in larger quantities than any other nursery. We have shipped them to more than fifty thousand different customers, and over and over year after year these customers come back for more.

While PREMIER is too well known by the leading growers to need a description, however for the new beginner we will say that PREMIER and Howard 17 are one and the same variety. The variety was originated by Everett C. Howard of Belchertown, Mass., and has become known by many as Howard 17.

PREMIER begins to ripen early. Covers a very long season. Usually large crops of large to very large berries, uniform in size and color. Foliage strong and healthy, and not subject to disease. Grows well on any good rich garden soil in any part of the country.

Last, PREMIER has never been known to miss a single crop from late frost. Blooms seem to be more hardy than most varieties. When you plant PREMIER you plant frost protection also.

12 for 25c; 100 for 75c; 1000 for \$5.00, prepaid.

Blakemore

Blakemore is an origination of Professor Beatty of the U. S. Department of Agriculture, Washington, D. C. It has been tested pretty thoroughly in most of the strawberry growing states, and every station that we have had reports on speak very favorably of it.

Said to be a cross between Premier and Missionary. In plant growth it resembles the Missionary very much, being a strong grower of small size plants. The fruit is bright red, shading to a darker red when thoroughly ripe. Size medium, of a round to conical shape. Red to the center without green tips. Flavor excellent and very firm. In productiveness it can be classed with such varieties as Dunlap, which has always been first in this respect. Our stock of plants are from the original source, and have been both State and Federal inspected this season, and we hold a clean certificate.

25 for 50c; 100 for 75c; 1000 for \$5.00, prepaid.

Blakemore.

Mastodon.

Mastodon

The Marvelous Everbearing Strawberry

We have been growing Everbearing Strawberries for twelve years and have tried twelve varieties. We have eliminated all but one. This has given excellent results. It will yield as much as the common varieties in June and will produce well all summer and fall.

The reports we have from the actual growers of Mastodon sound almost unbelievable. Had we not seen field after field of this wonderful berry in bearing we would hesitate to tell you of its incredible productiveness.

We have seen, mind you, seen fields producing crate after crate of berries the size and color of which would astound you. Often 18 to 24 berries would fill a quart box. This was happening in July, August, September and October, when berries bring a price of 35c to 40c per quart on the market. An acre will produce the first season from 200 to 400 crates, not quarts, per acre.

You might think that berries of such size might be inferior in color and flavor. Not so. Many of our patrons have exclaimed at the fine flavor and rich color of these berries, even in October and November. A shortcake at Thanksgiving is not unusual for the heavy foliage protects the berries from even hard frost.

Plant this berry for commercial use. It is the greatest fall money maker. We think that after this year we will catalog no other everbearer. That is our opinion of it.

Our stock came direct from the originator. In fact he brought us the plants himself in his Ford auto. Therefore, we know that your plants are genuine unmixed Mastodon. Special price while they last. **50c per doz.; \$1.50 per 100; \$10.00 per 1000, prepaid.**

Washington.

Washington

Guaranteed Genuine.
The "Honey-Sweet" Strawberry.

When you see Washington, the "Honey-Sweet" Strawberry, fruiting in your garden, you will see the most wonderful sight you ever have seen in Strawberries. The plants are so heavily loaded with big, deep, dark red berries they are simply a blaze of color.

Words and pictures simply cannot describe this most remarkable Strawberry.

Big? Yes. Many of the berries are much larger than the pictures shown here. The richest and sweetest Strawberry ever grown. The juice is just like syrup.

The most amazing new strawberry ever brought out; new in color, new in size, new in taste—a real revelation in keeping qualities, a wonderful performing Strawberry. **25 for 50c; 100 for 75c; 1000 for \$5.00, prepaid.**

The Quality of Strawberry Plants

In looking through the many catalogs you receive you will notice that many claim to be the largest growers of plants, and their plants are the best grown. We do not claim to be the largest grower of plants or that they are better than some others, but we have bought plants from some that make such claims in different parts of the country and have never received any better than we send out. In some cases we had to throw away half of the plants as they had the crowns broken or were so small that they were not worth planting. We guarantee the plants we send out to be as large and as fine as you get anywhere (no matter what you pay), and to be up in as good condition and if grown side by side, under like conditions, that they will produce as much and as good fruit.

We have a branch nursery between Constantine and Three Rivers, Mich., twelve miles from our office, that we devote exclusively to the growing of Strawberry plants. This farm is equipped with irrigation so that the plants never suffer from want of water and become stunted during drought. This soil is particularly adapted to Strawberry plants, growing long, fibrous roots.

We pack our Strawberry plants in slatted crates and ship the same day they are dug, working a night force at our packing house for this purpose. We guarantee our plants to reach the customer in a satisfactory condition.

KELLOGG'S BIG LATE. Extra late pistillate (female). Best late Strawberry ever put on the market. Has received more compliments and praise than any other extra late variety on record. Absolutely dependable. Big grower, big producer of big berries. No variety either early or late will produce more berries or better berries than Big Late. As firm as any berries that ever grew. A splendid shipper and a wonderful keeper. Should be mated with some late bi-sexual (male). Fruits extra well in either narrow or wide matted rows. This berry is superior to Cooper in every way. It has healthy foliage and is a better flavored berry all around, fully equal in size to Cooper. We have discontinued growing Cooper in favor of Kellogg's Big Late. If you want late berries that will make you the money on your investment, plant Big Late fertilized with Pearl. **25 for 50c; 100 for \$1.00; 1000 for \$5.00, prepaid.**

SENATOR DUNLAP (Per.). This berry is of the Warfield type, has a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any "rough and tumble" methods of culture to which it is likely to be subjected. It is a very heavy bearer of good size, even fruit of very beautiful dark red color. **Special price, 25c per 25; 60c per 100; \$3.50 per 1000, prepaid.**

HARVEST KING. Often known as The King of all June-bearing Strawberries. An exceptionally hardy, vigorous, self sustaining sort, unusually free from frost injury, and apparently capable of bringing a fine crop of fruit to maturity, almost regardless of weather conditions. Harvest King blossoms late, thereby protecting itself from late spring frosts, and then matures its fruit so rapidly that it ripens with Gibson, Senator Dunlap, and other varieties of similar season. The berries are very similar to Premier in size, color, shape and quality. **50c per 25; 75c per 100; \$5.00 per 1000, prepaid.**

BEAUTY. A new variety. This is a new variety of great promise. Has an exceptionally heavy foliage with lots of fine, long roots, making it very adaptable to dry sections. Has good keeping qualities. Berries very large, solid clear through. Very juicy and flavor of the finest. This fine color, high flavor and bright green calyx make it most attractive and command the best prices on the market. Originated in Three Rivers, Mich., by a prominent nurseryman there. Beauty, the Strawberry that keeps well. Named "Beauty" because it is more beautiful than any Strawberry grown. Berries borne on extra long fruit stems. Ripens midseason. "Beauty" makes a beautiful row. A good plant maker. Brings more money than Premier. **50c per doz.; \$1.00 per 100; \$6.00 per 1000, prepaid.**

DR. BURRILL (Per.). Fruit is large, beautiful, dark red in color, and of excellent flavor. Shape similar to the Senator Dunlap and ripens at the same time as the Dunlap; great canning berry; excellent for the home garden or for the market. No better medium ripening berry than Dr. Burrill or Senator Dunlap. **25c per 25; 60c per 100; \$3.50 per 1000, prepaid.**

GIBSON. Midseason. This variety has long been a favorite with commercial growers throughout the country. It is a heavy and sure cropper—in fact, during our many years' acquaintance with Gibson we have never known it to fail to produce a profitable crop. The plants are large and healthy, foliage strong, upright and abundant. Fruit is of the finest color, quality, flavor and appearance. Berries large, selling well on any market and fine for home use. Perfect flowering. **75c per 100; \$5.00 per 1000, prepaid.**

Kellogg's Big Late.

Gibson.

Eldorado Blackberries.

Blackberries

Blackberries do best on good soil, clay and sand mixture preferred, set in rows 6 feet apart and 2 feet in the rows. 3,500 are required per acre. Blackberries are in great demand now at 20c per quart. Give the boy a chance to try his mettle by letting him start a patch. He won't have any desire to leave the farm if he is successful in raising fruit. The varieties here given are perfectly hardy and will prove a source of profit. Beware of the Erie, Wilson, Jr., Lawton and their like; they will not stand our winters.

Eldorado. Largest hardy Blackberry grown. Free from rust and the best money maker here. Berries of the Eldorado bring 50c per crate more than Snyder on the local market. **50c per doz.; \$3.00 per 100; \$18.00 per 1000, prepaid.**

Blowers. Very large, finest flavor, and jet black. Canes grow upright, perfectly hardy. This variety is one of the most productive under cultivation. Begins to ripen in July and continues late. Sells for highest market price. **75c per doz.; \$3.00 per 100; \$20.00 per 1000, prepaid.**

Currants

Fay's Prolific. Berry averages large, juicy and less acid than Cherry; bush not quite so strong a grower. **10c each; \$6.00 per 100, prepaid.**

London Market. Bush vigorous, upright; fruit medium to large; color dark red, with sprightly acid flavor, very productive. **12c each; \$6.00 per 100, prepaid.**

Perfection. The latest introduction, being a cross between Fay's Prolific and White Grape, combining the best qualities of both. Berry bright red and large. The clusters average longer and the size of berry is maintained to the end of the bunch. Its quality is said to be superior to anything on the market today, being a rich, mild sub-acid flavor with plenty of pulp and few seeds. **15c each; \$10.00 per 100, prepaid.**

Cherry Currant. Red, sub-acid, very large. Is prolific and a good variety for home use or market. **2-yr. vines, 15c each; \$10.00 per 100, prepaid.**

Wilder. Leading Currant in Southern Michigan where it is largely planted for commercial uses. **2-yr. vines, 15c each; \$10.00 per 100, prepaid.**

Red Cross. A strong growing variety; exceedingly productive with long clusters. The currants are of large size and far sweeter than ordinary varieties. **2-yr., 10c each; \$8.00 per 100, prepaid.**

Perfection Currants.

Gooseberries

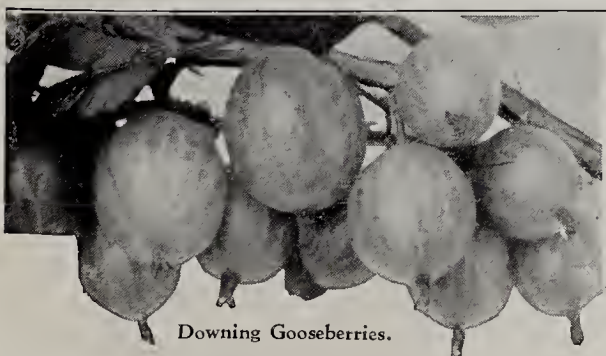

This fruit is very useful for cooking either green or ripe, and is used for canning extensively. Requires the same cultivation and treatment as currants. The surest method to prevent mildew is to plant thickly in the rows and mulch deeply, six or more inches, with straw, tan bark, coal ashes, etc. Plantations thus treated have borne large crops for twenty years. The mulch retains moisture in the driest weather; the few weeds that push up are easily pulled, and the fruit is large and more evenly ripened.

Price, all varieties: 20c each; \$10.00 per 100, prepaid.

Downing. Fruit large, round, light green with distinct veins, soft, juicy and fine flavored; vigorous and productive; smooth skin; one of the best.

Houghton. Medium size, pale red, sweet and juicy; vigorous grower, abundant bearer and free from mildew.

We sell 50 at 100 rate; 500 at 1000 rate.

Downing Gooseberries.

FEDERAL QUARANTINE ON CURRANTS AND GOOSEBERRIES

The Government has established a quarantine, forbidding nurserymen from shipping Currants and Gooseberries into Nebraska, the Dakotas, Kansas, Oklahoma, Texas, and all other states west of this line.

Unusual Evergreens and Shrubs

Rhododendrons

Those of you who have noticed the plantings in Cleveland and other cities in the North and East during the past 5 or 6 years will have noticed the large number of homes landscaped with Rhododendrons and Azaleas. These beautiful broad-leaved evergreens need no lengthy description. The exquisite beauty of the plant and the delicate shading of the masses of orchid-like blossoms, big as Peonies, appeal to everyone.

Directions for planting and growing furnished free.

Rhododendron Catawbiense.

Azalea Mollis - Hardy Azalea

This is one of the aristocrats of the flower family. The plant is absolutely hardy, grows to a height of 24 inches and is covered with a mass of bloom in orange and yellow colors through the month of May and early June, before the leaves appear. They are one of the most strikingly beautiful shrubs and attract more attention through the month of May than anything that we have

Hardy Azalea.

Daphne in Bloom. More Fragrant Than Lilacs.

Catawbiense (Catawba Rhododendron). One of the most beautiful native shrubs and the hardiest of all the Rhododendrons. In June every branch has a large cluster of 4- to 6-inch broad, rosy purple blooms. The foliage is the most handsome of any Rhododendrons. This, like the following species, is now used extensively in park planting and taken by carloads from native woods and mountains. Dug with care, with a ball of turfy soil, it may be successfully transplanted. The handsome large evergreen foliage is pleasant to behold the year around. Guaranteed nursery grown. **Clumps, 12 to 18 in., \$2.50 each; 10 for \$20.00.**

on our grounds. They are planted as a border to Rhododendrons and in beds by themselves. We have a large stock of this variety and have cut the price within the reach of all. **12 to 18 in., B&B, \$1.50; 18 to 24 in., B&B, \$2.50, f.o.b. Middlebury, Ind.**

Daphne

Cneorum. One of the few varieties of "Garland Flower" sufficiently hardy to use properly in this northern latitude, and should be given a sunny location. It is a very dwarf shrub, almost evergreen, with spreading branches on which the narrow, inch-long leaves are crowded; making very pretty trails of blue-green foliage. The soft pink flowers appear profusely during April and May, and at intervals throughout the summer; very small and dainty in terminal clusters, with a distinct and very pleasing sweet fragrance. **6-8 in., B&B, \$1.00; 8-12 in., B&B, \$1.25.**

Buy This Entire Collection and Save Money.

Water Lilies and Water Plants

Water Lilies are one of our leading specialties. We have constructed many pools the past two years and have them well stocked with the following hardy varieties. The stock we offer our customers consists of well established plants which we guarantee to bloom six weeks after planting, May shipment. Do not confuse with cheap bulbs.

Alba Grandiflora. Pure white, large blooms and a rampant grower, very fragrant. The best of all white varieties. **Each, \$1.00, postpaid.**

Opal. Large bloom, delicate pink shade, very fragrant, very hardy. Grows rapidly. **Each, \$1.00, postpaid.**

Chromatella. Highly popular yellow variety, extra large blooms and three to five buds in bloom all the time. Very popular. **Each, \$1.00, postpaid.**

Rose Arey. Beautiful fragrant variety with a color so dark pink that it is classed in the red varieties. Excessive bloomer, very fragrant. **Each, \$1.00, postpaid.**

Gloriosa. This is a grand Water Lily. Leaves and flowers only about one-half the size of the others but the color blood-red and the fragrance equal to the sacred lilies of the river Nile. **Each, \$1.50, postpaid.**

William Faulkner. The best Red Water Lily ever introduced. Blooms abundantly throughout the summer and is larger than Gloriosa. **\$2.00 each, postpaid.**

Sioux. Indian copper Lily. Very popular and a good grower. **\$1.00 each, postpaid.**

Paul Herriot. The best peach-colored lily on the market. Good bloomer. **\$1.50 each, postpaid.**

Extra Special on Water Lilies

One each of 8 varieties listed above, in blooming size clumps, postpaid, for \$7.50. \$10.00 value.

The above illustration was made from Lilies in bloom in our pools, summer of 1931. Varieties shown are Alba Grandiflora, Chromatella, Rose Arey, and Gloriosa.

Rhododendrons.

Grafted Junipers.

Wholesale Prices on Evergreen Sizes Suitable for Home

Every year finds an increasing number of planters interested in small evergreens suitable for starting a home nursery. These trees are intended for planting out in your garden where they can be cultivated and allowed to develop before being used in their permanent location. The use of small evergreens gives everyone an opportunity to enjoy beautiful evergreen trees at the minimum of expense. A small investment in baby evergreens will repay

Krider's Evergreen Seedlings

Seedlings and Small Transplanted Nursery Planting

you a hundred times, both in enjoyment of watching them develop as well as the continually increasing cash value of the trees. A small investment also will enable the farmer to greatly increase the income from his farm by growing seedling evergreens and grafted evergreens as a side line. The above two views are transplanted evergreens in our nursery known as four-year, twice transplanted, and we offer the following at these remarkable low prices.

Four Expensive Items You've Al- ways Longed For— Now at Prices You Can Afford to Pay!

Magnolia Soulangeana

This is the most decorative and most popular of the hardy Magnolias, producing a wealth of very large rose colored bloom just before the leaves in the spring. These blooms measure from 3 to 5 inches across and make a beautiful showing.

The Magnolia Soulangeana begins blooming when about 3 feet tall. It will eventually attain a height of from 8 to 10 feet.

Price, 18-24 in., \$3.50 each; 12-18 in., \$2.50 each; 2-3 ft., blooming size, \$4.50 each. All prices prepaid.

Blue Hydrangea.

Paul's Scarlet Thorn

A small shapely tree, up to twenty feet, with spreading crown, loaded with clusters of brilliant double flowers of exquisite carmine pink in June. Showiest of all the Hawthorns and a gem for the small lawn. The long sprays of blooms are prized for cutting. Rather slow growing, like all the Hawthorns.

Price, 4-5 ft., \$2.00 each; 3-4 ft., \$1.50 each, postpaid.

Blue Hydrangea

This Hydrangea has been the most desired of all the Hydrangeas offered to the trade. It blooms in great profusion, from New York City to Cleveland, Ohio; and south to Washington and Baltimore.

We began experimenting with this variety about five years ago and find that by covering in winter, they grow and bloom for us as readily as for our friends in Boston and Newport, who also have to protect them by covering in like manner.

This Hydrangea is a Japanese type that blooms pink flowers on the one-year stems, followed by blue flowers on the 2-year-old wood. In other words, it is necessary to have 2-year-old wood to have the blue Hydrangea.

We now have a nice stock of these young plants which we are offering to our customers in **8-12 inch size at \$1.00; 18-24 in. at \$2.00 each, postpaid.**

Magnolia Soulangeana.

Japanese Red-Leaved Maple

Rounded, dwarf trees seldom maturing to over 10 feet, densely furnished to the ground with indented leaves of unrivaled brilliancy and charm. Their early and mid-summer aspect is vivid blood-red, which dulls to a bronzy, purple-red toward fall. These are splendid foreground subjects in mixed groups or for solitary color blotches in the open lawn.

Price, 6-12 in., \$1.00; 12-18 in., \$2.00; 18-24 in., \$3.00 each. All prices prepaid.

Japanese Red-Leaved Maple.

Sensational Rose Offers

Talisman

Collection No. 1 Consists of:

Everest — the gold medal rose, fragrant ivory white with creamy suffusion resembling a peony on a long stem when developed. A Hybrid perpetual Tea Rose.

Red Radiance — a counterpart of radiance, possessing all the good traits of that valuable variety but differing in color which is bright cerise-red.

Dame Edith Helen — perfect buds developing into wonderful flowers of immense size on well foliated canes. It is a beautiful Rose du Barri Pink. Strongly sweet scented.

These are two year old, field grown, Hybrid tea roses of highest quality, propagated on Multiflora stock, in bloom in open field.

Free

Talisman, shown above, is the rose of many medals, and the outstanding sensation. It is given FREE with each \$1.00 collection.

Collection No. 2

Consists of:

Mrs. Aaron Ward — an Indian-yellow wonder of vigorous growth and fragrant double flowers. It is remarkably floriferous.

Los Angeles — one of the most beautiful roses thus far introduced. The long stemmed flowers are of a luminous flame-pink, toned with coral, shaded with translucent gold at the base of petals . . . Rich fragrance.

Luxembourg — one of the hardiest yellow roses grown and a remarkable bloom of dainty fragrance.

Wilhelm Kordes — a bronze rose of lovely fragrance and beauty. It grows on strong vigorous stems. A healthy plant of sufficient foliage.

Templar — a continuous bloomer with clear bright red blooms. This is a new forcing rose which is rapidly making its way into the garden . . . Strongly perfumed.

These are all two year old field grown hybrid tea roses

Free

Etoile de Hollande, the magnificent rose illustrated on the right and Talisman, shown above, sent to you Free with this \$2 collection of outstanding roses

Etoile de Hollande

Collection No. 3

Consists of:

President Hoover — positively one of the most outstanding roses of the day. A fine grower and a brilliant combination of cerise-pink, flame, scarlet and yellow.

Mrs. E. P. Thom — superior to Souv. Claud. Pernet for garden planting. The fine long buds open into perfect shaped flowers of rich lemon-yellow. Continually in bloom.

Mrs. Lovell Swisher — a new variety with immense heavy flowers of pale flesh-pink, excellent growth, and strong, erect stems. Blooms from spring to autumn.

Mme. Albert Barbier — large camellia shaped blooms cream and pinkish yellow. Blooms from spring to autumn.

E. G. Hill — a dazzling scarlet rose of free blooming habit. Easily one of Mr. Hill's greatest roses.

Wm. F. Dreer — a magnificent rose with everything to be desired. It is of silvery shell-pink and golden illumination.

These are all two year old hybrid tea field grown roses.

Premium PERENNIAL COLLECTIONS

2 YEAR OLD FIELD GROWN PLANTS

Collection "A" \$1

Consists of:

Hardy Chrysanthemums — pink, the last beautiful color in the fall garden.

Hardy Phlox — salmon they succeed in almost any soil or location, blooms of marvelous color.

Hardy Asters — blue, new varieties have made these flowers popular. They are simply gorgeous.

Hibiscus — red, a magnificent herbaceous plant growing 4 to 5 ft. tall with flowers resembling the hollyhock only much larger.

Delphiniums — blue, deservedly among the most popular border plants. Grows tall, stately.

Coreopsis — yellow, flowers of gold which bloom throughout the summer in profusion.

Shasta Daisy — white, marvelous flowers and most desirable for the perennial garden.

Statice Latifolia — lavender, called the Great Sea Lavender, a plant for the border or rockery, has tufts of leathery leaves, candlebra like heads frequently 1½ to 2 feet across.

These are all two year old field grown plants of the highest quality. Guaranteed. Will be shipped within 10 days, prepaid

EXTRAORDINARY ROCK GARDEN COLLECTIONS

AT UNPRECEDENTED PRICES AND QUALITY

All Named and Labelled CHOICEST VARIETIES

**Collection "C" Consists of: 4 Rock Garden
Evergreens and 8 Hardy Rock Garden Plants**

Mugho Pine—10 to 12 inches, five year old, three times transplanted. This is an excellent dwarf pine, globe shape, resembling erect candles.

Creeping Juniper—deep blue in color, they shoot their spire shaped branches almost horizontally.

Globe Arbor Vitae—Hovey's Golden, a small tree, globular in form; foliage light green with golden tinge and very compact; hardy. 12 to 15 in.

Biota Aurea Nana—No evergreen in our rockery gets the attention that this golden variety receives. They are grafted, twice transplanted, 9 to 12 inches high and give immediate effect. Catalogued at \$1.00 each.

Perennial plants include all varieties described in \$1.00 offer on right of page.

These 4 evergreens and 8 perennial rock garden plants will be sent to you in ten days prepaid, ready for planting. All plants and trees will be labelled.

Note: The Rockery below is on our own grounds near our office in Middlebury, Ind.

Beautifully Balanced Colors

Collection "D" EVERY PLANT

Consists of: DIFFERENT

Achillea (Milfoil or Yarrow)—suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries.

Alyssum—very popular for beds and borders and for winter flowering; of easy culture and free blooming.

Arabis (Rock Cress)—one of the most desirable of the very early spring-flowering plants that is especially adapted for edging and for rock garden, but does equally well in the border, forming a dense carpet of pure white flowers. Nice for cutting and lasting.

Veronica Rupestris—a pretty blue colored flowering plant. Grows 3 to 4 inches high, thickly matted deep green foliage hidden in the spring under a mass of bright blue blossoms.

Japanese Spurge—the touch to give the rockery a natural appearance and finishing off the corners next the rockery or pool.

Iris (dwarf)—Pumella, no single flower enjoys the rising popularity of the dwarf iris. Its beauty makes it a great favorite.

Phlox Sublata—an early spring-flowering type, with pretty moss-like evergreen foliage, which, during flowering season, is hidden under a mass of bloom.

Viola—or tufted pansies, very popular bedding plants, while not as large as pansies they bloom throughout the entire season from early spring until late autumn.

The above two year old plants will be sent to you carefully labelled, prepaid for only \$1 or will be included with the 4 Rock Evergreens for only \$2

PEONY COLLECTIONS

These Are Two Bargains You Will Never Forget

Peony Collection "E" 3 PEONIES \$1
3 to 5 EYE ROOTS For Only

1. Mikado (Jap) — Guards of heavy crimson, large and well developed. Crimson petaloids edged with gold. Popular Japanese type.

2. Haku Sei Koh (Jap) Single light pink petals, center almost white, very unusual and strikingly oriental in design and colors.

3. Tokio—big flower with broad, clear dark pink petals. Center of flower golden yellow. Free bloomer and an excellent strong grower.

Peony Collection "F"

6 PEONIES \$2
For Only

This collection includes all the Japanese Peonies described in the \$1 collection with the addition of the outstanding double peonies listed below

Felix Crouse—a full, rich, even shade of red without being suffused with violet, purple or crimson shades. Flowers solid and compactly built from edge to center. A dazzling ruby red. It is illustrated in color on the left.

Festiva Maxima—the finest white peony in existence. Blooms are often 7 to 8 inches in diameter. Clear carmine spots on edge of petals. Fragrant and fine for cutting.

Mrs. Bryan—a beautiful full crowned pink blossom of delightful fragrance. It is a fine bloomer and splendid for cutting. . . . Illustrated in striking beautiful color above.

Free

With each \$2 collection we will send you free the magnificent Peony "Krider's Caprice" illustrated in color above. This is a remarkable peony . . . The nearest yellow peony we have ever produced.
